United States Environmental Protection Agency

-- Public Notice --

U.S. Environmental Protection Agency

Standard Chlorine of Delaware (a.k.a. Metachem) Superfund Site

New Castle County, DE

--Record of Decision Amendment Proposed--

The U.S. Environmental Protection Agency (EPA) is announcing a proposed Record of Decision (ROD) Amendment for addressing off-site contaminated soils at the Standard Chlorine of Delaware (a.k.a. Metachem) Site located in New Castle County, Delaware.

EPA is proposing to modify a small component of the 1995 ROD that addresses the former soil waste piles only. The proposed amendment will provide a more efficient permanent remedy for the Operable Unit-2 (OU-2) soils. **The modification would involve placing the OU-2 soils within the OU-3 multilayer cap that is currently being constructed.** It is not proposing any modifications to the wetlands remedy, which is the primary component of OU-2.

If you would like to review the full proposed amendment, the document can be viewed on EPA's website at: http://www.epa.gov/superfund/standardchlorine

You're Invited!

EPA will hold a public meeting to discuss the proposed ROD amendment.

Tuesday, January 12, 2016
6:30 p.m. - 8:30 p.m.
Delaware City Fire Hall
815 5th Street
Delaware City, DE 19706
