Subject: NSR - An Alternate Path - 4/4 Meeting Cancelled

The next meeting (Tuesday 4/4) of the NSR Review Committee is cancelled. I believe we have substantially reviewed all of the important provisions of the FEL concept. We now need a revised Regulation 1125 with all the necessary FEL provisions and including revisions to the EOP and PSD sections for committee review. I'm not there yet. I think we need a fairly complete revised regulation to proceed with our review. Rather not do it piecemeal. Hopefully, I can get you something by a week before the next scheduled meeting. The next scheduled meeting is 4/25 so I'm going to try for a fairly complete revision of Regulation 1125 (Draft 3) in your hands by 4/18.
