

START ACTION NOTICE # 2019-05

- 1. TYPE OF ACTION: Revise Section 33.0 "Solvent Cleaning and Drying" of 7 DE Admin. Code 1124, Control of Volatile Organic Compound Emissions.
- 2. PURPOSE OF ACTION: Update control requirements based upon a 2012 Ozone Transport Commission (OTC) Model Rule. This will reduce the volatile organic compound (VOC) content used in cold degreasers from low-vapor pressure VOC to 25 g/l for most operations. A VOC emissions reduction of about one ton per day is anticipated as a result of this revision. This emissions reduction will help reduce the formation of ground-level ozone in Delaware.
- 3. STATUTORY BASIS: 7 Del. C. §§ 6010(a) and 6010(c).
- 4. IS THIS PROPOSED REGULATORY ACTION REQUIRED AS A RESULT OF FEDERAL STATUTE OR REGULATION?: No.
- 5. DATE OF MOST RECENT REVIEW/AMENDMENT: Amended on 11/1/2001.
- 6. LIKELY AFFECTED PUBLIC: Delaware users of cold degreasers which includes vehicle sales and servicing locations, machine shops, and manufacturers and servicers of electronic, pharmaceutical, and aerospace equipment. About 1000 such locations are in Delaware.
- 7. PROPOSED SCHEDULE OF ACTIVITIES: Workshops: Fall, 2019; Hearing: Winter, 2020; Effective Date: Summer, 2020.
- 8. REVIEW COMMITTEE: A Review Committee is not required as the revision is based upon a well-publicized OTC Model Rule that included significant stakeholder participation. Workshops (one per county) and a public hearing will provide adequate opportunity for public education, review and comment.
- 9. RESPONSIBLE STAFF MEMBER:  
 Valerie A. Gray Phone: (302) 739-9402
