“Should the permit be issued, the facility will be permitted to emit 0.35 lb/hr and 0.70 TPY of Particulate Matter (PM), 0.19 lb/hr and 0.40 TPY of Sulfur Dioxide (SO₂), 0.31 lb/hr and 0.60 TPY of Nitrogen Oxides (NO_x), 0.26 lb/hr and 0.50 TPY Carbon Monoxide (CO), and 0.03 lb/hr and 0.05 TPY of Volatile Organic Compounds (VOCs) by Permit# APC-2020/0177-CONSTRUCTION.”

I'm not a scientist, however this will most likely have a direct impact on the air we breathe here in the City. I've read up on these and perhaps if this permit is approved there should be a clause which requires Congo to plant a certain # of trees to offset the emissions from this device.

Ideally, nay, but if so, this should def be a requirement for them.

B. Bailey, Hedgeville resident (S Broom Street)

Thanks!
