Comments:

I am not opposed to this building as long as inspection is regularly conducted to insure compliance with the operating standard. I am concerned that a viewing area be available for those who wish to observe the procedure and insure that multiple bodies NOT be cremated during one firing. Co-mingling of remains is abhorrent as an insult to the deceased as well as a misrepresentation of the implied service provided and paid for. A viewing area which permits viewing by a relative or anyone granted power of attorney by the deceased should be made mandatory. If this provision is not a requirement for issuance of a permit, I respectfully request that it be provided in the compliance requirements for permit issuance.
