### Comments:

I live at 600 N Ford. There is a lot of residential housing that is impacted by businesses. There is a crematorium just up the street on Lancaster Ave that smells like hot dogs and spewing tremendous amounts of dense smoke when it is operated. They could look into partnering with the cemetery and updating that crematorium. We have Brandywine Counseling already negatively impacting our area. I am imploring you not to approve this. It would be better if they had an appropriate amount of property to separate them from residential homes. Karen Washington
