RE: Wastewater Design Proposal

Dear Ms. Roushey,

Please accept this letter as a request for the revision of the wastewater treatment system plant upgrade proposal. Under this revision, all anaerobic lagoons, including proposed anaerobic lagoon no. 3 will be replaced with two equalization tanks. This change is intended to address odor or groundwater quality concerns that some members of the public have expressed in connection with anaerobic lagoons.

The following documents are included as part of this submittal:

1. Drawing Index indicating the prints that have changed for this revision
2. An updated Final Design Summary signed and sealed by Reid Engineering
3. Updated flow diagram signed and sealed by Reid Engineering

Please contact me with any questions at 302-934-4052.

Sincerely,

A handwritten signature in blue ink that reads "Tanya Rogers-Vickers".
