

Good evening Deanna,

It has now been two business days since I requested this information, and I have not yet received even an acknowledgement that you have received it or are working to collect the information. When can I expect a response?

Joseph, I'm including you on this email to ensure that someone in the Division of Air Quality receives my email, and that it didn't just end up in Deanna's spam folder.

Thanks

Aaron

Subject: Economic data from this evening's public hearing
Date: Mon, 23 Sep 2013 20:06:48 -0400
Good evening Deanna,

During this evening's public hearing, I asked about the assumptions supporting the conclusions in the PowerPoint presentation. I'm looking for the number of miles driven per month, the overall lifetime of the vehicle, and the price of fuel for the 2025 estimate. I'd also like to know about the economic impact when the regulations initially go into effect in 2015.

In addition, how is increased repair cost factored into the economic estimates? What about the impact of the increased warranty period on the final price of vehicles?

Thanks

Aaron
