

## DNREC – Division of Air Quality

### PUBLIC HEARING NOTICE

#### **Regulation No. 1140 - Low Emission Vehicle Program**

The Department of Natural Resources and Environmental Control, Division of Air Quality (DAQ) will conduct a public hearing on planned revisions to 7 **Admin. Code** 1140, Low Emission Vehicle Program. The purpose of this action is to 1) remove the requirements that provide for prospective incorporation of revisions made by California, and 2) adopt by reference the applicable sections within Title 13 of the California Code of Regulations that comprise California's Low Emission Vehicle (LEV) III standard and the Greenhouse Gas (GHG) standard, also known as the Advanced Clean Cars Program for model years 2015 to 2025.

Delaware is committed to protecting public health and the environment through programs and policies that address air pollution and climate change. Smog, particle pollution, and toxic pollutants pose serious health concerns and increase the incidence of cardio-pulmonary diseases, asthma, and cancer, especially for sensitive groups of people including children, older adults, and people with heart or lung diseases.

Although significant progress has been made in addressing air pollution in Delaware, continued reductions of criteria pollutant emissions are needed to ensure and maintain federal ambient air quality standards. Significant reductions in GHG emissions are needed to address the growing threat of climate change in Delaware. In addition to reducing air pollution, the proposed amendments are designed to preserve consumer choice while ensuring the development of a full range of environmentally superior cars from compact cars to sports utility vehicles and pickup trucks. These vehicles will continue to deliver the performance, utility, and safety consumers have come to expect along with savings from reduced fuel costs, given higher mileage requirements and enhanced warranties.

The purpose of the public hearing is to present the draft amendments to 7 DE Code 1140 and to gather comments and testimony from the public.
