To: Morozowich, Deanna (DNREC)
Subject: State Air Reg's

I am opposed to adopting any standards for car sales in Delaware that mandate sales of so called "green" vehicles or any other attempt to copy California programs. We do not need to spend more money on purchasing vehicles in this state. DNREC's position that we will still have choices is not true when numbers are established requiring certain purchases of electric vehicles.

I do not want to see any additional changes to Delaware's air regulations that impact automobile standards.
