Secretary Collin O'Mara

Dear Secretary O'Mara,

I applaud the Markell administration for proposing clean car standards that will reduce smog-forming pollution and make our air cleaner to breathe. I urge you to finalize those clean car standards as soon as possible.

We have a long way to go to make Delaware's air clean. In a recent report, the American Lung Association awarded air quality in Delaware's three counties two F's (New Castle and Sussex) and one D (Kent) due to the frequency of high ozone days. The proposed standards will reduce smog-forming pollution from our passenger cars and trucks by 75 percent, preventing premature deaths, reducing asthma attacks and giving Delawareans cleaner air to breathe.

Further, I urge you to adopt policies that will increase the number of plug-in electric vehicles in Delaware, particularly the Zero Emission Vehicle program. Increasing electric vehicle options can help Delaware reduce our dependence on oil and combat climate change.

Once again, thank you for proposing clean car standards that will make our air cleaner to breathe. I urge you to finalize these standards as soon as possible.

Sincerely,

Ms. Sabine Buergermeister
Heinrich-Mann-Str. 5
Freiburg/Germany, DE 79100

Secretary Collin O'Mara

Dear Secretary O'Mara,

Good job!

I applaud the Markell administration for proposing clean car standards that will reduce smog-forming pollution and make our air cleaner to breathe. Knowing that we will never be able to do this if Republicans come in to office, I urge you to finalize those clean car standards as soon as possible.

We have a long way to go to make Delaware's air clean. In a recent report, the American Lung Association awarded air quality in Delaware's three counties two F's (New Castle and Sussex) and one D (Kent) due to the frequency of high ozone days. The proposed standards will reduce smog-forming pollution from our passenger cars and trucks by 75 percent, preventing premature deaths, reducing asthma attacks and giving Delawareans cleaner air to breathe.

Secretary Collin O'Mara

Dear Secretary O'Mara,

Collin, the citizens of DE are paying attention. With the Fiskar failure, we need some real wins here environmentally in DE for the State and Nation to pay attention. You are a brilliant young man, get off the hamster wheel and make a difference for the people of Delaware.

Your career has a visual scar because of the Fiskar deal. Give us some real wins in DE, our environment, the nations environment really need it.

I applaud the Markell administration for proposing clean car standards that will reduce smog-forming pollution and make our air cleaner to breathe. I urge you to finalize those clean car standards as soon as possible.

Oct 2, 2013

Secretary Collin O'Mara

Dear Secretary O'Mara,

I applaud the Markell administration for proposing clean car standards that will reduce smog-forming pollution and make our air cleaner to breathe. I urge you to finalize those clean car standards as soon as possible.

We have a long way to go to make Delaware's air clean. In a recent report, the American Lung Association awarded air quality in Delaware's three counties two F's (New Castle and Sussex) and one D (Kent) due to the frequency of high ozone days. The proposed standards will reduce smog-forming pollution from our passenger cars and trucks by 75 percent, preventing premature deaths, reducing asthma attacks and giving Delawareans cleaner air to breathe.

Further, I urge you to adopt policies that will increase the number of plug-in electric vehicles in Delaware, particularly the Zero Emission Vehicle program. Increasing electric vehicle options can help Delaware reduce our dependence on oil and combat climate change.

Once again, thank you for proposing clean car standards that will make our air cleaner to breathe. I urge you to finalize these standards as soon as possible.

Sincerely,

Mrs. Martha Black de Frias
221 Thorn Ln Apt 9

Oct 2, 2013

Secretary Collin O'Mara

Dear Secretary O'Mara,

I applaud the Markell administration for proposing clean car standards that will reduce smog-forming pollution and make our air cleaner to breathe. I urge you to finalize those clean car standards as soon as possible.

We have a long way to go to make Delaware's air clean. In a recent report, the American Lung Association awarded air quality in Delaware's three counties two F's (New Castle and Sussex) and one D (Kent) due to the frequency of high ozone days. The proposed standards will reduce smog-forming pollution from our passenger cars and trucks by 75 percent, preventing premature deaths, reducing asthma attacks and giving Delawareans cleaner air to breathe.

Further, I urge you to adopt policies that will increase the number of plug-in electric vehicles in Delaware, particularly the Zero Emission Vehicle program. Increasing electric vehicle options can help Delaware reduce our dependence on oil and combat climate change.

Once again, thank you for proposing clean car standards that will make our air cleaner to breathe. I urge you to finalize these standards as soon as possible.

Sincerely,

Dr. David Chandler

Dear Secretary O'Mara,

I applaud the Markell administration for proposing clean car standards that will reduce smog-forming pollution and make our air cleaner to breathe. I urge you to finalize those clean car standards as soon as possible.

We have a long way to go to make Delaware's air clean. In a recent report, the American Lung Association awarded air quality in Delaware's three counties two F's (New Castle and Sussex) and one D (Kent) due to the frequency of high ozone days. The proposed standards will reduce smog-forming pollution from our passenger cars and trucks by 75 percent, preventing premature deaths, reducing asthma attacks and giving Delawareans cleaner air to breathe.

I think that Delaware ought to look at California's emissions standards. They have regulated emissions from power plants, from industries such as the agriculture business, (farm tractors, farm trucks, farm pick-up trucks), the transportation industry; semi's across the country that emit pounds of ozone due to non compliance of codes. I feel that if these industries were seriously investigated, this will make a huge impact on our air and our health.

Once again, thank you for proposing clean car standards that will make our air cleaner to breathe. I urge you to finalize these standards as soon as possible.

Sincerely,

Mrs. Milagros Pistritto
