To: Morozowich, Deanna (DNREC)  
Subject: CALIFORNIA POLLUTION

Blaming pollution on auto emissions is NOT logical and the secondary COST to De taxpayers will be obscene.

I for one will be communicating with my Senator and Representative to address "nanny state" agendas kiss the auto sales in delaware good by. I will buy my car 5 miles away in NJ where the cars will be cheaper, less pollution rules  
this is why DENREC ideas will not work  
plus

-----

FACT: the negative impact on California's economy is one main reason why California is BANKRUPT.  
Lets not forget ONE big factor that CREATES Delaware pollution

1. Chester PA. there are NO pollution rules between the state line of DE and Philadelphia
  2. Refineries in Philadelphia and NJ
- air does not recognize state lines

-----

WANT TO ADDRESS ONE BIG CANCER PROBLEM IN DELAWARE

install an air pollution monitoring station in North Wilmington (high cancer concentration)  
located in the immediate area of Rt. 202 & RT. 141 near the AstraZeneca and Merck laboratories  
hundreds of vent pipes AND permits to release toxic air near the Nemours Childrens hospital is unacceptable

I have a home up north in Maine

when I come back to north wilmington, I have headaches and sinus problems for 2-3 weeks trying to adapt to the air

reason, I live near Astra Zeneca and their laboratories.
