The Secretary of the Department of Natural Resources and Environmental Control ("Department") has found Jesse Singh ("Respondent") in violation of *7 Del. C. Chapters 60 and 74, 7 DE Admin. Code 1351, the Delaware Regulations Governing Underground Storage Tank Systems* ("UST Regulations") and *7 DE Admin. Code 1124, Delaware Regulations Governing the Control of Volatile Organic Compound Emissions* ("VR Regulations"). Accordingly, the Department is issuing this Notice of Administrative Penalty Assessment and Secretary's Order ("Assessment and Order") pursuant to *7 Del. C. § 6005(b)(3)*.

BACKGROUND

The Department's Tank Management Section ("TMS") conducted a compliance inspection of the Underground Storage Tank ("UST") systems at the above-referenced facility on March 13, 2017. During the inspection, the Department recorded eighteen (18) violations. The Department issued a certified *Request for Information* ("RFI") letter on March 20, 2017, requiring that Respondent submit proof of compliance to TMS within thirty (30) days of receipt of the RFI for the eighteen (18) violations. Respondent submitted documentation satisfying sixteen (16) of the eighteen (18) violations. Two (2) of the violations from the RFI remained unresolved.

On June 27, 2017, the Department issued a Notice of Violation ("NOV") letter to Respondent for the remaining two (2) violations. Respondent contacted TMS and requested a meeting to discuss the remaining violations. A meeting was held on July 20, 2017 between the Respondent and TMS personnel at which the Respondent produced documentation satisfying violation #1 as listed in the NOV. However, violation # 2 remained unresolved. Currently, there is one (1) outstanding violation that Respondent has not addressed:

1. Failure to produce annual Automatic Tank Gauging ("ATG") equipment inspection results.

FINDINGS OF FACT AND VIOLATION INCLUDING REGULATORY REQUIREMENTS

As noted in the June 27, 2017, NOV, Respondent was in violation of the following provision of 7 *Del. C.* Chapters 60 and 74, the UST Regulations, and the VR Regulations. Each day of violation is a separate violation for each UST System:

**1. The UST Regulations: Part B, Sec.2.9.5, Automatic Tank Gauging Release
Detection Requirements for Tanks**

2.9.5.1.5: Owners and Operators shall have all ATG equipment inspected by a certified technician once every twelve (12) months as part of a preventive Maintenance program to minimize in-service failures. The inspection shall at a minimum include:

2.9.5.1.5.1: Inspection of the ATG console for proper printer operation if so equipped; and

2.9.5.1.5.2: Verification of the system setup valves and battery backup; and

2.9.5.1.5.3: Verification of the test programming; and

2.9.5.1.5.4: Verification of the operability of all warning and alarm indicator lights and audible alarms; and

2.9.5.1.5.5: Inspection and testing of the magnetostrictive probes and sensors in accordance with the manufacturer's specifications or as directed by the Department to verify proper probe and sensor operation; and

2.9.5.1.5.6: Inspection of all cables that are visible during normal operating conditions for any cracking or swelling; and

2.9.5.1.5.7: Correction of any problems found as a result of the required inspection.

2.9.5.2: Owners and Operators shall maintain a record of all Release Detection tests performed by ATG equipment for the life of the UST System.

Observation:

At the time of the Department's compliance inspection, the annual ATG equipment inspection results for 2016 were not available for review.
