

Sea Level Rise Advisory Committee
Natural Resources Workgroup
5/19/11
11 a.m.-Noon
Meeting Notes

Agenda Items

Review revised Table of Contents

Karen Bennett proposed a modified draft TOC. The group seemed to prefer Karen's organization of the content which offered a more logical grouping of resource and habitat types. We will use the updated version.

Status of Vulnerability Assessment Worksheets

Many worksheets complete. All should be submitted by 5/23.

Heritage and DCP need to coordinate on running SLR scenarios on the elemental occurrence data for rare species.

Process for Group Edits

Google Docs can be used for group edits, discussion, and comments. Several workgroup members were already familiar with the site. Kelly and Trish can help those who need it or email the worksheets directly if using Google docs is a problem. Please complete edits by 6/10 to allow Kelly and Trish time to compile edits prior to next Advisory Committee meeting (6/16).

Review Draft Timeline

See timeline below

Google Docs Tutorial- time permitting

Kelly clicked through a couple pages to give the workgroup a brief overview of the site and its features.

Draft timeline for completion of Vulnerability Assessment

May 23- ALL Vulnerability Assessment worksheets turned in
Worksheets available to group on Google Docs

June 10-Group edits complete on all VA worksheets
