

Vulnerability Assessment Template

Author(s):

Please provide your name(s) and organization

Resource:

Provide the name of the type of infrastructure, economic resource, environmental resource etc. that will be described.

Exposure to Sea Level Rise:

Tables and Information from the exposure analysis will be inserted here. Please provide additional supporting background or general information about the resource.

Users and Uses:

Please indicate who the users of the resource are, or what groups benefit from the resource. Describe the uses (functions/values/benefits) of the resource. Please indicate what, if any, competing uses or users exist.

Fiscal Capacity:

Please identify and describe funding sources that are utilized to manage or make improvements to the resource. Please note whether there are existing revenue gaps or unmet revenue needs.

Regulations & Policies:

Please identify and describe any Federal, State or local regulations or policies that are used to manage or direct this resource. Please indicate whether these regulations and policies include flexibility to address the impacts discussed above.

Potential Economic Impact:

Based upon the exposure analysis distributed and discussed at the 3/15 advisory committee meeting, please describe any potential direct and indirect economic impacts. Depending upon availability of information, this could include direct impacts like replacing buildings, rebuilding infrastructure and displacement of residents. It can also include potential indirect impacts like loss of tourism, loss of flood protection or increased transportation costs. Where cost estimates are available, please include them or indicate that there is no available data source.

Potential Social Impact:

Based upon the exposure analysis distributed and discussed at the 3/15 advisory committee meeting, please describe the potential direct and indirect social impacts. Depending upon availability of information, this could include direct impacts to residents like loss of services, increased travel distance or loss of homes. It could also include other impacts like quality of life. If no information exists, please note.

Potential Environmental Impact:

Based upon the exposure analysis distributed and discussed at the 3/15 advisory committee meeting, please any potential direct and indirect environmental impacts resulting from inundation of the resource.

Additional Information:

Please provide any additional information that could be important to assessing the potential impact of inundation to this resource. This may include reports or studies that have been conducted, questions that need to be answered to fully describe the impact, research that must be conducted, etc.
