

Resource Name	Within a SLR area?	Data Limitations (caveats)	Resource Impact Descriptions			Include in next phase?	What additional information is necessary to determine impact	Cross-Sector Impact Descriptions		
			Inundated at Lunar High Tides (1-4 times/month @ 1-4 hours)	Inundated at High Tide (1-2 times/day @ 1-4 hours)	Inundated at Low Tide (always inundated)			Social Impact	Economic Impact	Environmental Impact
Schools (K-12) (public)	No					No				
Schools (K-12) (private)	Yes									
Fire and Rescue stations	Yes					Yes	Floor elevations, access road elevations			
Emergency Medical Services	Yes					Yes	Floor elevations, access road elevations			
Police stations							Floor elevations, access road elevations			
Communication/cell towers							Critical equipment elevations			
Telephone switching stations							Floor, critical equipment elevations			
Roads	Yes									
Bridges	Yes						Bridge deck elevations, access road elevations			
Bus Routes							Stop Locations			
Airports										
Railroads - Stations/Lines/Holding areas										
Ports and Ferry Terminals	Yes						Floor, critical equipment elevations			
sewer pump stations	Yes						Pressure or gravity, construction, access points			
sewer lines	Yes						Floor, critical equipment, outfall elevations			
sewer treatment facilities (WWTP)	Yes						Invert elevations			
CSOs	Yes									
spray irrigation fields										
community treatment facilities										
public drinking water wells							Wellhead elevations			
Electric generation/distribution							Critical Equipment elevations			
Hospitals and medical facilities	No	Parking lot of Nanticoke Hospital could experience flooding								
Emergency Operation Centers	No	Proposed Wilmington EOC in 1.0m zone								
Emergency Shelters							Floor elevations, access road elevations			
Evacuation Routes	Yes									
Pipelines							Pipeline construction, Access points			
Water Supply Intakes										
School Bus Storage										
DelDOT Maintenance Yards										
Navigation Aids										
Correctional Facilities	No									
National Guard Facilities										
Day Care centers							Floor elevations, access road elevations			
Senior Centers							Floor elevations, access road elevations			
Nursing Homes							Floor elevations, access road elevations			
Refineries							Floor, critical equipment elevations			
Factories							Floor, critical equipment elevations			
SIRB (superfund,HSCA)							Contaminates, method of containment			
Underground Storage Tanks	Yes						Flotation potential, Effects of differing depth of water (Crush pressure, vent leak, etc.)			
Leaking Underground Storage Tanks	Yes						Flotation potential, Effects of differing depth of water (Crush pressure, vent leak, etc.)			
Brownfields	Yes						Contaminates Present			
Oil Facilities										
Waste Processing Plants/Recycling Facilities							Floor, critical equipment elevations			
Salvage Yards	Yes						Materials present			
Haz Waste Generator	Yes									
Landfills	Yes						Bottom elevation, liner			
Marinas and Boat Launches	Yes									
Dams and Spillways							Top elevation, construction			
Dikes and Levees	Yes						Top elevation, construction			
Tide Gates	Yes						Construction			
Tide Gauges	Yes									
Public Utilities										
Private Utilities										
Wind Generation										
Cemeteries										
Government Buildings	No	Only includes buildings occupied by cabinet level staff, highest level judicial, and multi-agency office buildings					Floor elevations			
Government Buildings - Secondary	Yes						Floor, critical equipment elevations, Building Use
