**HAND DELIVERED**

ATTENTION: Victor Clark  
Vice President and General Manager

**SUBJECT: Notice of Violation(s)  
Visible Emissions Electric Arc Furnace (EAF) and Associated Equipment**

Dear Mr. Victor Clark:

On September 24, 2008, the Department of Natural Resources and Environmental Control's Air Quality Management Section discovered that Evraz Claymont Steel was operating the EAF and associated equipment in violation of the permit issued under the State of Delaware "**Regulations Governing the Control of Air Pollution.**"

During a site visit on the above mentioned date, visible emissions were observed exiting an open portion of the meltshop roofline running adjacent to the Duct Work to the Electric Arc Furnace. These emissions were in excess of forty percent (40%) opacity. For this reason, Evraz Claymont Steel Claymont is found to be in violation of Conditions 2.6, and 3.1 of **Permit: APC-81/0363-OPERATION(Amendment 4)(NOX RACT)(PTE)**, issued July 2, 2008, for the failure to maintain visible emissions below the required limitations in addition to failing to maintain the facility in a manner consistent with good air pollution control practice for minimizing emissions.

Please provide documentation detailing the excess emissions violation and any and all actions taken concerning said violations to prevent current and future occurrences.

Please be advised that this Notice of Violation will be made available through the Department's Internet site, which can be found at <http://www.dnrec.delaware.gov>. Information concerning your Company's noncompliance with the State of Delaware's "**Regulations Governing the Control of Air Pollution**" will be posted within 24 hours following receipt by the Department of the return receipt accompanying this letter. Upon further review of the violation(s), the Department reserves the right to pursue additional enforcement action.

*Delaware's Good Nature Depends on You!*
