NEWS UPDATES

UNIVERSAL RECYCLING AVAILABLE JANUARY 1, 2013 FOR DELAWARE'S MULTI-FAMILY COMPLEXES - New Year's Day 2013 marks the expansion of recycling services in Delaware to include multi-family apartment and condominium complexes. Waste collectors have partnered with multi-family complexes to provide recycling services along with their trash services through the state's universal recycling program. All single family homes that have trash collection service began receiving recycling service from their waste haulers in September 2011, as did most restaurants and bars. By Jan. 1, 2014, all commercial businesses will be participating in a comprehensive recycling program. Recycling participation is dramatically higher throughout Delaware in the last 15 months, according to reports from waste haulers, while landfill disposal volumes are down. Multi-family dwellings – apartment and condo complexes – will be provided recycling collection in the same fashion as their trash collection. Single stream recycling, which allows all recyclables to be tossed together into one container for pickup, separate from the trash, has made recycling easier than ever before. Apartment and condo management staff will provide information on recycling to their residents. For additional information, please contact Michael Globetti at (302) 739-9902 or visit: <http://www.dnrec.delaware.gov/News/Pages/Universal-recycling-available-Jan--1,-2013-for-Delaware's-multi-family-complexes1231-8797.aspx>

CHRISTMAS TREE RECYCLING – A DELAWARE POST-HOLIDAY TRADITION – CARRIES ON STATEWIDE FOR 2012-13- TAKE YOUR TREE TO A YARD WASTE SITE OR CONTACT YOUR WASTE COLLECTOR - Delawareans are encouraged to give their recycling spirit a boost after the holiday season by delivering their Christmas trees to one of many yard waste recycling facilities located throughout the state. Many of the facilities will accept the trees for free; they are listed below. (**Please note that Christmas trees are no longer accepted for recycling at any Delaware State Park locations.**) Christmas trees will be accepted for recycling from December 26 to Jan. 26, 2013 from families only at the facilities listed below. Trees will not be accepted from commercial haulers or tree vendors without prior approval. Artificial decorations, including hooks, wire, tinsel and ornaments, as well as wood and metal tree stands, must be removed from all trees before dropping them off for recycling. Christmas tree recycling saves valuable landfill space. At least 18 percent of residential waste is composed of grass, leaves, brush, trees and other lawn maintenance and landscaped materials. Many entities collect Christmas trees, including various waste haulers and landscapers. Your regular trash hauler may provide one-time collection for Christmas trees in January. For a partial listing of entities that collect Christmas trees and other yard waste go to: www.dnrec.delaware.gov/yardwaste and click on "Yard waste collection options." Christmas trees, stripped of all decorations and detached from tree stands, can be dropped off by Delaware residents for free at any of the following locations:

SITE INVESTIGATION AND RESTORATION SECTION – The Division's Site Investigation and Restoration Section (SIRS) is responsible for the identification, evaluation and remediation of sites in Delaware that have had past releases of hazardous substances. The Section manages the contaminated sites under three major programs in accordance with the Hazardous Substance Cleanup Act (HSCA). The three programs are the Brownfields Development Program, the Voluntary Cleanup Program (VCP) and the HSCA Enforcement Program (for sites requiring enforcement action). The Brownfields Development Program encourages the cleanup and redevelopment of vacant, abandoned or underutilized properties, which may be contaminated. A party seeking to develop such a property negotiates with SIRS for a Brownfields Development Agreement (BDA) to perform an investigation and, if necessary, a remedial action or remedy, for the purpose of addressing the risks posed by past releases of hazardous substances at these sites. However, a BDA is only available to parties that are not current site owners. The Voluntary Cleanup Program (VCP) Agreement is available to site owners, who want to clean up their sites and are already liable as a potentially responsible party for the site. For site-specific information on the following sites, please see SIRS's superfund site files database at:

<http://docs.dnrec.delaware.gov/sirbsitefiles.cfm>. Proposed and final plans of remedial action are available online at: <http://www.dnrec.delaware.gov/whs/awm/SIRB/Pages/SIRBPlans.aspx> under "Announcements."

FINAL PLAN OF REMEDIAL ACTION FOR THE FORMER DELMARVA RURAL MINISTRIES SITE (DE-1523)

- The Site Investigation and Restoration Section (SIRS) has adopted a plan regarding the clean-up of the Former Delmarva Rural Ministries Site in Dover. The 0.5 acre Site is located at 26 Wyoming Avenue, Dover. Future development of the Site is as a parking lot. The proposed cleanup includes restricting the Site to commercial use, prohibiting land-disturbing activities, prohibiting the installation of groundwater wells without DNREC approval, and restricting building on Site prior to a vapor intrusion evaluation. DNREC issued public notice of the Proposed Plan of Remedial Action for the Former Delmarva Rural Ministries Site on December 12, 2012. There were no comments or questions from the public regarding the Proposed Plan. The public may appeal this Final Plan until January 29, 2013.
