### **LEGAL NOTICE - 7 DE Admin. Code 1102 NATURAL MINOR PERMIT APPLICATIONS**

Notice has been given that:

Proximity Malt, LLC, has requested a modification to existing permits (Permits: APC-2016/0060 through 0063-CONSTRUCTION) to account for adjusted stack parameters, reroute emission streams through different control equipment, and increase emissions from control equipment at their 33222 Bi-State Boulevard, Laurel location in Sussex County. The proposed changes do not

represent an increase in expected emissions from the kilns, but permitted emission limits for sulfur dioxide (SO<sub>2</sub>) will increase 0.15 pounds per hour and 0.654 tons per year (TPY) for each permitted unit due to a previous calculation error. Additionally, designs for pollution control devices have changed since the permit was last amended. As a result of these design changes, net emissions from the four (4) proposed control devices have increased by 0.92 TPY of particulate matter (PM) and particulate matter less than 10 microns (PM<sub>10</sub>) as well as by 0.37 TPY of particulate matter less than 2.5 microns (PM<sub>2.5</sub>).

The application for this permit may be reviewed at the offices of the Division of Air Quality, State Street Commons, 100 W. Water Street, Suite 6A, Dover, Delaware or 715 Grantham Lane, New Castle, Delaware. For additional information or for an appointment to review the application, please contact Tracy Mattson at (302) 7399402.

A public hearing on any of the above applications will NOT be held unless the Secretary of DNREC receives a request for a hearing regarding that application within 15 days from the date of this notice, ending Monday, **April 23**. **SITE INVESTIGATION AND RESTORATION SECTION (SIRS)** is responsible for the identification, evaluation, and remediation of sites in Delaware that have had past releases of hazardous substances. The section manages the contaminated sites under three major programs in accordance with the Hazardous Substance Cleanup Act (HSCA). The three programs are the **Brownfields Development Program, the Voluntary Cleanup Program (VCP), and the HSCA Enforcement Program** (for sites requiring enforcement action).

**The Brownfields Development Program** encourages the cleanup and redevelopment of either the entire property, the expansion of the property, or the reuse of the property which may be hindered by the reasonable held belief that the property may be contaminated. A party seeking to develop such a property negotiates with SIRS for a **Brownfields Development Agreement (BDA)** to perform an investigation and, if necessary, a remedy, for the purpose of addressing the risks posed by past releases of hazardous substances at these sites. However, a BDA is only available to parties that are not current owners or operators of the site. The **Voluntary Cleanup Program (VCP) Agreement** is available to site owners who want to clean up their sites and are already liable as a potentially responsible party for the site.
