#### **LEGAL NOTICE - TITLE V SYNTHETIC MINOR PERMIT APPLICATIONS**

Notice is hereby given that Bracebridge Corporation (A Wholly Owned Subsidiary of Bank of America) – Deerfield Complex has submitted an application, pursuant to 7 DE Admin. Code 1102, Section 2.1, 11.2.9, and 12.3 for an amendment to their operating permit for their facility located at 655 Paper Mill Road, Newark, Delaware.

Bracebridge-Deerfield Complex requests a permit amendment to increase the operational hours for six (6) emergency generators currently located at the facility. The requested increase is due to the local utility performing a substation transformer upgrade project in which the utility service will need to be interrupted as the equipment is replaced. The increase in the operational hours for the emergency generators will prevent a forced shutdown of critical facilities and business operations. In addition, revisions to the operational and emissions limits of the boilers and miscellaneous fuel burning equipment have also been included in the requested permit amendment. Total permitted emissions for the facility are 22.50 TPY of Nitrogen Oxides (NOX), 8.40 TPY of Carbon Monoxide (CO), 0.90 TPY of Total Hydrocarbons (THC), 0.30 TPY of Sulfur Oxides (SOX), and 1.00 TPY of Particulate Matter (PM10). These limits are necessary to restrict Bracebridge's potential to emit air pollutants, and the limits will be enforceable by both the EPA, and the State.

The application, the "draft" permit (APC-1997/0492-OPERATION(Amendment 10) (SM)), all materials that the applicant has submitted (other than those granted confidential treatment under DNREC rules), and a copy or summary of other materials, if any, considered in preparing the "draft" permit may be inspected at the office of the Division of Air Quality, State Street Commons, 100 W. Water Street, Suite 6A, Dover, DE 19904. **SITE INVESTIGATION AND RESTORATION SECTION (SIRS)** is responsible for the identification, evaluation, and remediation of sites in Delaware that have had past releases of hazardous substances. The section manages the contaminated sites under three major programs in accordance with the Hazardous Substance Cleanup Act (HSCA). The three programs are the **Brownfields Development Program, the Voluntary Cleanup Program (VCP), and the HSCA Enforcement Program** (for sites requiring enforcement action).

**The Brownfields Development Program** encourages the cleanup and redevelopment of either the entire property, the expansion of the property, or the reuse of the property which may be hindered by the reasonable held belief that the property may be contaminated. A party seeking to develop such a property negotiates with SIRS for a **Brownfields Development Agreement (BDA)** to perform an investigation and, if necessary, a remedy, for the purpose of addressing the risks posed by past releases of hazardous substances at these sites. However, a BDA is only available to parties that are not current owners or operators of the site. The **Voluntary Cleanup Program (VCP) Agreement** is available to site owners who want to clean up their sites and are already liable as a potentially responsible party for the site.

**The Proposed and Final Plans of Remedial Action** listed below outline site cleanup activities and covenants and are available online at:  
<http://www.dnrec.delaware.gov/whs/awm/SIRB/Pages/SIRBPlans.aspx> under "Announcements." For site-specific information, please see DNREC's Environmental Navigator at:

**LEGAL NOTICE - FINAL PLAN OF REMEDIAL ACTION FOR THE CAVALIERS COUNTRY CLUB - OPERABLE UNIT 1b Site (DE-1600)**

The Department invited public comment on a proposal to clean-up Cavaliers Country Club - Operable Unit 1B (OU-1B or Site) located at 100 Addison Drive in Newark. The Site is part of a former 18-hole golf course that has been divided into three operable units, OU-1A, OU-1B, and OU-2, to facilitate cleanup and redevelopment. Cavaliers Country Club-OU-1B consists of approximately 70 acres located on the eastern half of the 18-hole golf course including the club house and parking lot.

Cavaliers Country Club-OU-1B will be subject to the following remedial actions: the submittal of a Remedial Action Work Plan, which specifies the methods to be used to remediate the Site including the removal and disposal of primarily arsenic-impacted soils, blending of arsenic-impacted soils, or capping with impervious material (e.g., buildings, asphalt, or concrete) to meet DNREC Hazardous Substance Cleanup Act (HSCA) standards for all contaminants; and the recording of an Environmental Covenant restricting property use to non-residential at certain locations, restrict interference with remedy at those locations, limiting groundwater withdrawal, requiring compliance with the Long-Term Stewardship (LTS) Plan, and compliance with the Contaminated Materials Management Plan (CMMP).

DNREC issued public notice of the Proposed Plan for the Cavaliers Country Club OU-1B Site on January 6, 2019. There were no comments or questions from the public regarding the Proposed Plan. Details of the Final Plan are available at the office of DNREC-SIRS (391 Lukens Drive, New Castle, DE, 19720), or online at: <http://www.nav.dnrec.delaware.gov/DEN3/>
