

Event: Regulation 24 "Control of Volatile Organic Compound Emissions" Regulatory Subgroup Meeting

Date: February 13, 2006

Location: Air Quality Management's Grantham Lane Facility in New Castle

Objective of Meeting: The subgroup will review the recently revised draft regulatory language

**Minutes:**

1. Meeting commenced at approximately 0915 hours.
2. Subgroup members discussed various new aspects of the recently revised draft regulatory language. Most discussions focused on
  - Basis for the baseline year
  - The feasibility of the compliance schedule in the years after 2016
  - Whether the focus should be on the lightering operation or the service vessels
  - Various paragraphs where the language was unclear or could be improved
3. AQM indicated that it would consider the areas discussed and redraft the language, if appropriate
4. The subgroup decided to tentatively meet again on March 13 at the same time and place to address the revised language if necessary
5. The meeting ended at approximately 1100 hours
