Subject: Regulation 1147

I would like to take this opportunity to express my opinion on the current measure under consideration. I think that the CO2 credits should be auctioned completely (100%) from the beginning instead of a process to eventually reach that goal. Other states in the RGGI are auctioning all of their credits and Delaware should be among them. In addition, the proposed giveaway of credits amounts to a loss of revenue for Delaware, something that we cannot afford, especially at present.

Thank you for allowing me to express my opinions for the record.
