

TITLE 7 NATURAL RESOURCES & ENVIRONMENTAL CONTROL

DELAWARE ADMINISTRATIVE CODE

PROPOSED

1100 Air Quality Management Section

1124 Control of Volatile Organic Compound Emissions

(Break in Continuity of Sections)

12.0 Surface Coating of Plastic Parts.

~~04/11/2010~~ xx/xx/xxxx

12.3.1.2 For a plastic parts or products coating unit that applies multiple coatings, which are subject to the same numerical emission limitation in Table 12-1 of this regulation, the daily-weighted average VOC content, calculated in accordance with the procedure specified in ~~Appendix C~~ Appendix C of this regulation, is less than or equal to the limit in Table 12-1 of this regulation corresponding to the category of coating used, or

12.3.2.7 An alternative method demonstrated to be capable of achieving a transfer efficiency equal to or better than HVLP spray and approved by the Department and by the EPA.

(Break in Continuity of Sections)

19.0 Coating of Metal Furniture

~~04/11/2010~~ xx/xx/xxxx

19.1 Applicability

19.1.1 The provisions of 19.0 of this regulation apply to any metal furniture coating unit. Except as provided in 19.1.2 of this regulation, every owner or operator of any metal furniture coating unit shall comply with the provisions of 19.0 of this regulation on and after ~~[insert effective date]~~ 4/11/2020.

19.3.2.7 An alternative method that is demonstrated to be capable of achieving a transfer efficiency equal to or better than HVLP spray and approved by the Department and by the EPA.

19.6.1 The acid content of pretreatment coatings and etching fillers shall be determined by ASTM International Method D 1613 -06.

20.0 Coating of Large Appliances

04/11/2010 xx/xx/xxxx

20.3.2.7 An alternative method that is demonstrated to be capable of achieving a transfer efficiency equal to or better than HVLP spray and approved by the Department and by the EPA.

20.6.1 The acid content of pretreatment coatings and etching fillers shall be determined by ASTM International Method D 1613 -06.

(Break in Continuity of Sections)

22.0 Coating of Miscellaneous Metal Parts

04/11/2010 xx/xx/xxxx

22.1 Applicability

22.3.1 Except as provided for in ~~22.3.3~~ 22.4, no owner or operator of a miscellaneous metal parts and products coating unit subject to 22.0 of this regulation shall cause or allow the application of any coating to miscellaneous metal parts and products unless:

22.3.2.7 An alternative method that is demonstrated to be capable of achieving a transfer efficiency equal to or better than HVLP spray and approved by the Department and by the EPA.

22.6.1 The acid content of pretreatment coatings and etching fillers shall be determined by the ASTM International Method D-1613 -06.
