Mark,

Thanks for sending the meeting minutes. It looks like things are moving along and that there may be just some minor details to resolve.

I do not expect that EMA will have any additional comments on Draft 3. However, based on the CO2 question, I will check with EMA members on that issue. Although we continue to object to inclusion of CO2 standards in the regulation, I am pretty sure that engine-based systems will be able to meet the proposed standards and that compliance will not be an issue.

Happy Holiday.

Joe Suchecki
