SAN # 2009-08

1. TITLE OF THE REGULATIONS:

Amendment to Regulation 1138 Emission Standards for Hazardous Air Pollutants for Source Categories

2. BRIEF SYNOPSIS OF THE SUBJECT, SUBSTANCE AND ISSUES:

Under Section 112(k) of the 1990 Clean Air Act Amendments, Congress mandated that the EPA identify 30 or more hazardous air pollutants (HAPs) that posed the greatest threat to public health in urban areas, to identify the small area sources that emit those pollutants and to develop regulations to reduce the emission of HAPs. In 1999, the EPA identified 33 HAPs that posed the greatest threat to public health and has, since that time, identified over 60 new area source categories for which regulations are being developed.

In January 2008, the EPA promulgated another of these area source category standards that will affect existing and future Delaware sources; the area source standard for paint stripping and miscellaneous surface coating operations under 40 CFR Part 63 Subpart HHHHHH.

Delaware is proposing to amend Regulation 1138 by adding a new Section 13 that covers area source paint stripping operations that use chemical strippers containing methylene chloride. The purpose of this proposed amendment is to provide increased protection for Delaware citizens against a variety of potential adverse health effects linked to a long term exposure to methylene chloride. In addition, methylene chloride is classified as probable human carcinogens by the EPA. The proposed amendment will provide greater consistency between Delaware's air toxics standards for these paint stripping operations and the recently promulgated federal standard (40 CFR Part 63 Subpart HHHHHH) on which this proposed amendment is heavily based.
