

## Section 15 Presentation

### Key Definitions

**Area source** is any stationary source or group of stationary sources located within a contiguous area and under common control that does not emit nor have the potential to emit considering controls, in the aggregate, 10 tons per year or more of any hazardous air pollutant (HAP) and 25 tons per year or more of any combination of hazardous air pollutants (HAPs).

**Hazardous air pollutants (HAPs)** are any air pollutant listed in or pursuant to Section 112(b) of the Act. HAPs are also called air toxics. Cadmium, chromium, lead, manganese and nickel compounds are listed in Section 112(b).

**Target HAPs** are compounds of cadmium, chromium, lead, manganese, or nickel.

**Mobile equipment** is any device that may be drawn and/or driven on a roadway including, but not limited to, heavy-duty trucks, truck trailers, fleet delivery trucks, buses, mobile cranes, bulldozers, street cleaners, agriculture equipment, motor homes, and other recreational vehicles (including camping trailers and fifth wheels). For the purposes of Section 15, mobile equipment includes, but is not limited to, assembled mobile equipment, mobile equipment parts, and accessories for mobile equipment.

**Motor vehicles** are any self-propelled vehicle, including, but not limited to, automobiles, light duty trucks, golf carts, vans, and motorcycles. For the purposes of Section 15, motor vehicles include, but are not limited to, assembled motor vehicles, motor vehicle parts, and accessories for motor vehicles.

**New affected source** is any surface coating operation that meets the following two criteria.

1. The owner or operator commenced the construction of the affected source after September 17, 2007 by installing new surface coating equipment. If the owner or operator of an existing source purchases and installs spray booths, enclosed spray gun cleaners, or purchases new spray guns to comply with Section 14, this action would not make the existing affected source a new source.
2. The new surface coating equipment is used at an area source of HAPs that was not actively engaged in surface coating operations prior to September 17, 2007.

**Existing affected source** is any surface coating equipment that is not a new affected source.

## Acronyms

AQM	Air Quality Management Section
Cd	Cadmium
CFR	Code of Federal Regulations
Cr	Chromium
DE	Delaware
DNREC	State of Delaware, Department of Natural Resources and Environmental Control
EPA	U. S. Environmental Protection Agency
HAPs	Hazardous Air Pollutants
HVLP	High Volume, Low Pressure
Mn	Manganese
Ni	Nickel
Pb	Lead
Sub 6Hs	40 CFR Part 63 Subpart HHHHHH
VOCs	Volatile Organic Compounds
