

**TAB 6**

**Engineering Report**  
**(Checklist Item #6)**

**Cherry Island Landfill**  
**Sanitary Landfill Permit Renewal**

Section 4.2.1.4 of the Delaware Regulations Governing Solid Waste (DRGSW) requires that an engineering report be included in permit renewal applications which describes proposed design features, proposed installation methods and procedures, construction schedule, proposed design capacity and a construction quality assurance plan. At this time there are no proposed design changes, which would include installation methods and procedures, construction schedule, proposed design capacity and a construction quality assurance plan. All previously proposed and subsequently approved improvements at the Cherry Island Landfill have been completed and as such there are no items to include in an engineering report. For reference a copy of the last approved engineering report, which was prepared by GeoSyntec Consultants, and submitted as part of the most recent Cherry Island Landfill permit renewal application in May 2005 has been included on the cd attached as Appendix A (volumes 7, 8, 9, 10 and 11) of this application. The Cherry Island Landfill will continue to operate in accordance with this approved engineering report.
