Subject: Off-Shore Windfarm

Dear Mr. Noyes,

I just finished reading today's Dover Post article about the proposed wind farm and I want to voice my support for such a project. Delaware does not have a strong pro-environment history, but has made gains recently with solar farms and tax credits. We live downtown and installed a geo-thermal system several years ago on our property. Had purchasing credits toward wind energy been available, we would have certainly done so. (Our property has too any trees for solar panels to work.)

A wind-farm would be wonderful for our environment, our energy bills and our economy. It would attract highly skilled workers as well.

Thank you for your kind attention to my comments.

Yours truly,

Kathleen M. Doyle
