**Delaware Weatherization Assistance Program
Supplemental Clarification
Local Weatherization Provider Request for Proposals
June 27, 2012**

The following point of clarification is being provided with regard to Proposal Contents.

Regarding Section IV. Proposal Contents, Subsection D. Description of Services and Qualifications: this section of the proposal is separate and different from Attachment 4. Respondents should fill out both Section IV and Attachment 4. Furthermore, in Attachment 4, the Company Profile & Capabilities, Respondents may use additional pages in responding to the questions. However, as always, we remind prospective Respondents that as referenced in several sections of the RFP, proposals should aim to remain as concise and straightforward as possible, and to refrain from overly lengthy narratives or materials beyond those sufficient to present a complete and effective proposal.
