

Green Energy Program Incentives
Chart Effective December 1, 2016

Geothermal Heat Pump Grants	Residential (\$/ton)	Non-Residential (\$/ton)	Non-Profit (\$/ton)	
First 2 tons	\$800	\$800	\$1,000	
Over 2 tons	\$700	\$700	\$800	
Maximum Grant	\$5,000	\$30,000	\$30,000	
Solar Water Heating (SWH) Grants	Residential \$/kWh Saved	Non-Residential \$/kWh Saved	Non-Profit \$/kWh Saved	
SWH Water Heater Only	\$1.00	\$1.00	\$2.00	
SWH with Integrated Heating	\$1.00	\$1.00	\$2.00	
Maximum Grant	\$5,000	\$10,000	\$10,000	
Wind Turbine Grants	Residential (\$/Watt)	Non-Residential (\$/Watt)	Non-Profit (\$/Watt)	
0 to 5,000 Watts	\$0.85	\$0.85	\$1.75	
5,001 to 50,000 Watts	\$0.25	\$0.25	\$1.00	
Maximum Grant	\$15,000	\$24,000	\$50,000	
Photovoltaic Grants	Residential (\$/Watt)	Residential PPA/Lease	Non-Residential	Non-Profit (\$/Watt)
0 to 5,000 Watts	\$0.50	No incentive	Flat incentive of \$3,000 per project	\$1.50
5,001 to 50,000 Watts				\$0.75
Maximum Grant	\$3,000			\$41,250

Notes:

1. These incentives apply to Delmarva Power and Light (DPL) customers only.
2. Geothermal systems must meet minimum EER rating of ≥ 18 and COP ≥ 3.6 at partial load.
3. Solar Water Heating system grants are calculated based on the \$/kWh saved [OG-300 rating](#) issued by the Solar Rating Certification Corporation (SRCC). Systems with an SRCC OG-300 certification must have the energy savings calculation completed and stamped by a Delaware Licensed Professional Engineer.
4. Photovoltaic and wind turbine grants are limited to systems 50 kW and under. Splitting systems by meter or otherwise to remain under the 50 kW limit is not allowed, funding will be denied for these projects. Grants applications are evaluated by site address, not electric meter.
5. Incentives for non-residential projects with an installed capacity below 6,000 watts will be pro-rated at \$0.50 per watt.
