

# Green Energy Program Incentives

*Effective July 1, 2020*

<b>Geothermal heat pump grants</b>	Residential (\$/ton)	Non-residential (\$/ton)	Non-profit (\$/ton)
First 2 tons	\$800	\$800	\$1,000
Over 2 tons	\$700	\$700	\$800
Maximum grant	\$5,000	\$30,000	\$30,000

<b>Solar Water Heating (SWH) grants</b>	Residential <i>\$/kWh saved</i>	Non-residential <i>\$/kWh saved</i>	Non-profit <i>\$/kWh saved</i>
SWH water heater only	\$1.00	\$1.00	\$2.00
SWH with integrated heating	\$1.00	\$1.00	\$2.00
Maximum grant	\$5,000	\$10,000	\$10,000

<b>Wind turbine grants</b>	Residential <i>(\$/watt)</i>	Non-residential <i>(\$/watt)</i>	Non-profit <i>(\$/watt)</i>
0 to 5,000 watts	\$0.85	\$0.85	\$1.75
5,001 to 50,000 watts	\$0.25	\$0.25	\$1.00
Maximum grant	\$15,000	\$24,000	\$50,000

<b>Photovoltaic grants</b>	Residential <i>\$/watt</i>	Residential PPA/lease	Non-residential <i>\$/watt</i>	Non-profit <i>(\$/watt)</i>
0 to 5,000 watts	\$0.60	No incentive	\$0.60	\$1.50
5,001 to 50,000 watts	\$0.60	No incentive	\$0.60	\$0.75
Maximum grant	\$5,000	No incentive	\$25,000	\$41,250

## Notes:

- These incentives apply to Delmarva Power and Light (DPL) customers only.
- Geothermal systems must meet minimum EER rating of >18 and COP >3.6 at partial load.
- Solar water heating system grants are calculated based on the \$/kWh saved OG-300 rating issued by the Solar Rating Certification Corporation (SRCC). Systems with an SRCC OG-300 certification must have the energy savings calculation completed and stamped by a Delaware licensed professional engineer.
- Photovoltaic and wind turbine grants are **no longer** limited to systems 50 kW and under. Grant applications are evaluated by site address, not electric meter.
- Incentives for non-residential projects with an installed capacity below 6,000 watts will be prorated at \$0.50 per watt.
