

# 2010 DELAWARE Fishing GUIDE

Department of Natural  
Resources & Environmental Control  
[www.fw.delaware.gov](http://www.fw.delaware.gov)

# Go where the real wild things are!

The Department of Natural Resources and Environmental Control's Division of Fish and Wildlife and the Department of Agriculture's Delaware Forest Service invite you to discover some of Delaware's most unique wild places by taking advantage of free public access to our public lands. Here's just a few of the things you can do!

- Explore more than 60,000 acres in 20 state wildlife areas
- Enjoy 18,000 acres in three state forests
- Watch birds and wildlife
- Pack a picnic and enjoy the scenery
- Hike, bike and go horseback riding on trails
- Hunt upland game, fowl, game birds in season
- Launch from more than 50 boat access areas
- Sail, canoe, kayak and boat our ponds, rivers and bays
- Cast a line into tidal and non-tidal waters
- Fish or boat in more than 30 ponds

To learn more about recreational possibilities on Delaware public lands, please visit the DNREC Division of Fish and Wildlife's website at [www.fw.delaware.gov](http://www.fw.delaware.gov) or the DDA Delaware Forest Service's website at <http://dda.delaware.gov/forestry>.

## From the Director of the Division of Fish and Wildlife

The Division of Fish and Wildlife is pleased to provide the 2010 Delaware Fishing Guide. We try to make it as user friendly as possible with the information that anglers should be aware of while fishing, clamming, or crabbing in Delaware.

Joanna Wilson

We face many challenges this year with decreased funding and personnel while fishing issues remain. Weak-fish populations are at all time low levels along the eastern coast so possession limits have been greatly reduced. The new limit is 1 fish per angler per day with a minimum size of 13 inches. The Nanticoke River largemouth bass fishery, however, remains strong due to the popularity of Catch & Release and the supplemental stocking of largemouth bass fingerlings to enhance the limited natural reproduction in this tidal system. Improvements to shoreline access along many of our public ponds have been made during the past two years and repairs and upgrades to fishing access sites continue. The new Lewes boat launch facility is providing popular access for saltwater anglers while construction proceeds for a new access site in Laurel at the upper end of Broad Creek.

The advent of the General Fishing License in 2008 has improved our ability to match federal funds for fisheries projects, both for management and facilities development. The FIN number program is running smoothly and will prevent Delaware anglers from having to purchase a federal fishing permit under a program beginning in 2011. I hope you have a successful fishing season and enjoy Delaware's various waterways.

Maps for this publication were created by the Office of the Secretary's GIS section. Fish illustrations were drawn by Duane Raver, and the shark illustrations by Bob Jones. The cover photo was contributed by Laura Madara. A special thanks to the Delaware fishermen and DNREC staff who donated pictures throughout this guide.

All of the information in this guide, and much more, may also be found on the Division's website [www.fw.delaware.gov](http://www.fw.delaware.gov).

## Fishing License Requirements and F.I.N. Number

A general fishing license is required for fishing, crabbing, or clamming in all waters of the State of Delaware including both tidal and non-tidal areas. Additionally, all anglers (resident and non-resident alike) age 16 or older must obtain a free Fisherman Information Network (F.I.N.) number on an annual basis before fishing in Delaware waters. The new (F.I.N.) regulation went into effect January 1, 2009. A fishing license may be obtained from the Dover office, on-line ([www.fw.delaware.gov](http://www.fw.delaware.gov)), or from over 100 license agents (most bait and tackle, sporting goods, and hardware stores), throughout the State. The FIN number can be obtained at this web address (<http://www.delaware-fin.com/>); or by automated telephone (1-800-432-9228); or for live operator/customer service: 1-866-447-4626. See page 8 for more information about the new F.I.N. number requirement.

A fishing license is valid through December 31 for the calendar year in which it is issued. All funds derived from the issuance of fishing licenses are dedicated to a special account for the purpose of matching and securing federal money allotted to Delaware under the provisions of the Federal Aid in Sportfish Restoration Act and cannot be diverted to other causes. Together, these funds support projects having as their purpose the restoration, conservation, management and enhancement of sportfish and the provision for public use and benefits from these resources.

To order or purchase a fishing license online, go to: [www.fw.delaware.gov](http://www.fw.delaware.gov). Select "Licenses – Hunting, fishing, boating."

### 2010 License Fees

License Category	Resident	Non-resident
General Fishing License	\$8.50	\$20.00
7-day Tourist	NA	\$12.50
*Boat License 20 ft or less (optional)	\$40.00	\$40.00
*Boat License more than 20 ft (optional)	\$50.00	\$50.00
Head Boat License	\$300.00	\$600.00
Charter Boat License	\$150.00	\$300.00

**\*Boat License** - The optional boat license for recreational fishermen covers the holder of the license, and all occupants in that boat, as do the charter boat and head boat licenses. A resident who purchases a Delaware boat-fishing license also will be given a single Delaware fishing license for their own use on those occasions that he or she may not be on the boat.

**Non-residents** - Any non-resident who is 16 years of age or older except persons covered by one of the exemptions is required to have a license to fish, clam, or crab in the waters of the State of Delaware. Non-residents may purchase a 7-consecutive day fishing license. *continued on page 7*

## Fishing License Exemptions

The following are exemptions to the license provisions:

**Surf Fishing Permit** - Residents and non-residents are exempt from fishing license requirements if they are the operator of a vehicle with a valid Delaware surf fishing vehicle permit when that vehicle is located on a designated Delaware State Park beach. Other occupants of that vehicle are required to have a fishing license if they are fishing.

**Seniors** - Residents of the State of Delaware 65 years and older are exempt from fishing license requirements but must have proof of age and residency. A Permanent Exempt License can be requested free of charge by contacting the Division of Fish and Wildlife (302-739-9911). Non-resident seniors are not exempt.

**Children** - Children under the age of 16 are exempt.

**Other Exemptions** - Any resident who owns or lives on a farm in this state containing 20 or more acres and the members of his or her immediate family who **reside** on the farm may fish on that farm without a license.

A member of the armed forces who is a patient in a military hospital and submits a written statement signed by the patient's commanding officer certifying the nature of the disability and place of station.

Persons who are patients in any Veterans Administration facility in this State, or in any public hospital or sanitarium for the treatment of tuberculosis, or a patient in a rehabilitation hospital under the State Department of Health, provided such person carries identification which verifies his or her status as such a patient, shall not be required to purchase a fishing license. Forms shall be supplied to such persons when they apply for their licenses to be used for the identification purposes.

Residents living in this State for at least 1 year immediately prior to the date of application for a license who have been honorably discharged from the armed forces of the United States and certified by the Veterans Administration as having at least a 60% service-connected disability.

Any patient in a rehabilitation hospital under the Department of Health and Social Services.

Any person who is legally blind.

Any person who fishes in a fee-fishing facility, registered as such with the Department of Agriculture.

Any resident who has served honorably for 90 or more consecutive days on active duty in the Armed Forces of the United States, including service as member of the Delaware National Guard, in military actions in Southwest Asia associated with Operation Iraqi Freedom or Operation Enduring Freedom may, for the first 12 months following the date the resident was honorably discharged or removed from active status, be issued a license to fish in this State without charge.

## **Mandatory F.I.N. Number**

### **All Delaware Anglers Fisherman Information Network (F.I.N.)**

#### **What is a F.I.N. number?**

A F.I.N. number is a unique fisherman identification network number that you are required to obtain free of charge. The National Marine Fisheries Service (NMFS) will use the data obtained from the F.I.N. program to identify anglers for survey purposes. The program allows for better estimates of recreational landings, an important component of fisheries management.

#### **Who must obtain a F.I.N. number?**

All residents and non-residents who are age 16 or older (including 7-day non-resident licensed anglers) wishing to recreationally fish in Delaware waters. This includes even those anglers not required to obtain a general fishing license, such as residents 65 or older, those fishing from a vessel licensed for fishing, those fishing under a surf vehicle permit, and those otherwise exempted under 7 Del. Code , § 502. If you only fish from a charter or a head boat you do not need a F.I.N. number.

#### **Why do I need a F.I.N. number?**

The F.I.N. number allows Delaware to meet new federal requirements without additional cost to the angler. The number is mandatory and failure to provide a valid F.I.N. number to an enforcement agent will be treated the same as a failure to have a valid fishing license.

#### **Where do I record my F.I.N. number?**

Record your F.I.N. number in the spaces provided on your Delaware Fishing License. If you are exempt from the license requirement, be sure to record and carry your F.I.N. number with you when you are fishing.

To obtain your free F.I.N. number online go to <http://www.delaware-fin.com/> or call (800) 432-9228. For live operator customer service call: (866) 447-4626.

For additional License Requirements see page 6.

## Freshwater Trout Fishing

Delaware's freshwater trout program is a self-supporting put-and-take fishery in selected New Castle County streams and Kent and Sussex County ponds. Revenue generated from the sales of trout stamps is used to purchase rainbow, brook and brown trout for stocking (see page 12). Summer water temperatures limit trout survival and reproduction in Delaware waters, so stocked fish are meant to be taken, but may be released at the angler's discretion.

### Season / Hours

The 2010 freshwater trout season in New Castle County opens at 7:30 a.m. on Saturday April 3, 2010. No fishing is allowed in designated trout streams two weeks (14 days) prior to the scheduled opening of the trout season. It is unlawful to fish for trout in designated trout streams between one-half hour after sunset and one-half hour after sunrise.

Trout season in Tidbury (Kent County) and Newton (Sussex County) Ponds opens at 7:00 a.m. on Saturday March 6, 2010.

### Trout Stamps

A trout stamp is required to fish in a designated **trout stream** from the first Saturday in April through June 30 and from the first Saturday in October through November 30 unless exempted by law. A trout stamp is also required to fish **Tidbury Pond** in Kent County and **Newton Pond** in Sussex County from the first Saturday in March through March 31. This year all licenses and stamps will be issued in an electronic form, and these trout stamps must be signed across the face to be valid. To obtain an original printed stamp, anglers may call 302-739-9918, and the stamp will be mailed after December 31, 2010.

### License and Stamp Requirements for Trout Fishing

Resident/ Age	Fishing license	Young Angler trout stamp	Trout Stamp
Under 12	No	No	No
12 thru 15	No	Yes	No
16 thru 64	Yes	No	Yes
65 and over	No	No	No
Fee	\$8.50	\$2.10	\$4.20
Non-resident/Age			
Under 12	No	No	No
12 thru 15	No	No	Yes
16 and over	Yes	No	Yes
Fee	\$20.00		\$6.20

*continued on page 10*

**Possession Limits of Trout**

It shall be unlawful for any person to catch and/or have in his possession more than six (6) trout in any one day; except, it shall be unlawful to possess more than four (4) trout in or within 50 feet of any fly fishing only waters (restricted trout streams).

**Special Fly Fishing Only Sections (Restricted Trout Streams)**

White Clay Creek from a point 25 yards above Thompson Bridge at Chambers Rock Road to the Pennsylvania state line is designated as a fly fishing only trout stream (Restricted Trout Waters). It is unlawful to use any metallic, plastic or rubber spinners, spoons, lures, plugs and/or natural bait or to use more than two (2) flies on a line at any one time.

*If you are interested in collecting Trout or Duck stamps, please contact the Division at 302-739-9911 or visit our website at [www.fw.delaware.gov/Fisheries/Pages/TroutStamp.aspx](http://www.fw.delaware.gov/Fisheries/Pages/TroutStamp.aspx)*

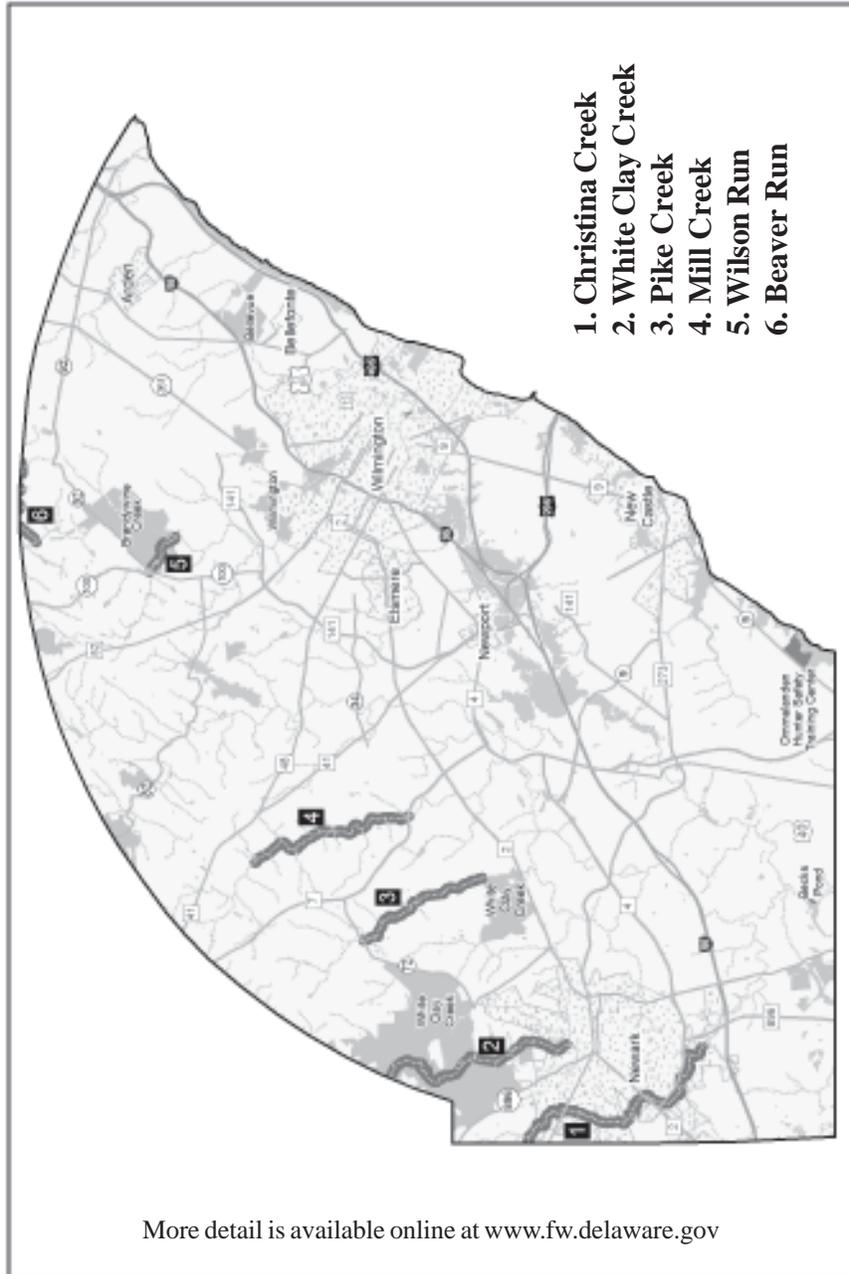

It is unlawful to possess more than four (4) trout within 50-feet of a fly fishing only section (restricted trout waters). Anglers may catch and release trout on these waters as long as the four (4) trout possession limit is not exceeded. All trout released must be returned to the water as quickly as possible with the least possible injury.

**Designated Trout Streams**

Designated Trout Stream	Description
Beaver Run	Pennsylvania line to Brandywine River
Christina Creek	Entire stream
Pike Creek	Route 72 to Henderson Road
Mill Creek	Brackenville Road to Route 7
White Clay Creek	Pennsylvania line to the downstream side of Paper Mill Road. Fly fishing only (restricted trout stream) section from a point 25 yards above Thompson Bridge at Chambers Rock Road to the Pennsylvania state line.
Wilson Run	Route 92 through Brandywine Creek State Park

*Most access to these streams is through and on private property or state park land. Each fisherman should respect the privilege of using private property.*

## Designated Trout Streams

## 2010 TENTATIVE TROUT STOCKING SCHEDULE

Below are the locations, dates and numbers of trout to be stocked

Water	◆ Prior to season	March 18	April 5	April 8	April 12	● April 15	April 22	● April 29	Mid-Oct.
<b>Streams</b> <i>(Season opens 7:30 a.m. April 3)</i>									
Beaver Run	715		200	200	200				
Christina Creek	2,570			800	400	200	500		
Mill Creek	210			150					
Pike Creek	410			150					
White Clay Creek	8,750		2,000	2,000	1,200	2,000	3,000	2,000	2,000
Wilson Run	1,845			700	200	200	■ 708		
<b>Ponds</b> <i>(Season opens 7 a.m. March 6)</i>									
Newton Pond	700	700							
Tidbury Pond	550	550							

◆ Prior to season: stocking includes trophy-sized rainbow trout (14 inches or greater) at all locations

● April 15 and 29: Brown trout averaging 11 inches will be stocked at all locations listed.

■ April 22: Stocking of 11-inch and trophy-sized rainbows to prepare for annual handicapped anglers fishing derby in Wilson Run at Brandywine Creek State Park. For details on the fishing derby, please call the park office at 302-577-3534.

## General Non-tidal Fishing Regulations

These are some of the regulations and state statutes that all anglers should be familiar with. Most have been edited to make them easier to read and understand. This is not a complete list and it is up to the angler to be familiar with all of the laws and regulations currently existing or newly adopted. For a complete listing, refer to the Department of Natural Resources and Environmental Control, Division of Fish and Wildlife website or request a copy from the Director's office.

Unless otherwise authorized, it shall be illegal for any person to fish for any freshwater fish in the non-tidal waters of this State with any fishing equipment or by any method, unless it is provided for in the following subdivisions:

A hook and line may be used, with each line to have no more than 3 hooks or 3 separate lures with hooks.

Unless a person is fishing through the ice, the number of hooks and lines that any one person is permitted to use to fish for any freshwater fish in the non-tidal waters of the State shall be no more than 2.

A person may use a dip net to aid in landing any freshwater finfish taken or caught by hook and line in the non-tidal or fresh waters of the State.

Carp may be taken and/or fished for by using a bow and arrow and/or spear, unless said equipment or method is otherwise restricted by any Department regulation. At this time, no carp may be taken from State Park ponds using bow and arrow.

It is illegal to sell, trade, or barter any finfish taken from the non-tidal waters of this State, unless authorized to do so in a permit issued by the Director.

It is illegal to take shad, except by hook and line, and no more than two (2) lures attached. Each lure may have no more than one (1) single pointed hook.

It is illegal to knowingly snag fish in non-tidal waters with any hook (single, double or treble) or otherwise catch or attempt to snag or catch any game fish by hooking the fish in any part of the body other than in the mouth.

It shall be unlawful for any person to fish within ten (10) feet of an entrance or exit of a fish ladder or to remove fish from any fish ladder between March 15 and May 30.

### **Closure of Department Ponds during Draw-downs**

It shall be unlawful for any person to fish in any pond or lake administered by the Department when the water level is lowered for any purpose provided it is duly posted with signs by the Division that state it is closed to fishing.

*continued on page 14*

continued from page 13

### **Speed and Wake of Motorboats on Division Ponds**

It shall be unlawful for any person to operate a motorized vessel, except at a **slow-no-wake speed**, on any pond or lake administered by the Division.

### **Fish Stocking Practices**

It shall be unlawful for any person to stock any species of fish into the non-tidal public waters of this State without the written permission of the Director. This regulation does not prohibit the stocking of private impoundments.

### **Possession, Transportation, and Sale of Illegal Species**

It shall be unlawful for any person to transport, purchase, possess, or sell walking catfish (*Clarius batrachus*) or the white amur or grass carp (*Ctenopharyngodon idella*) or live northern snakehead fish (*Channa argus*) or blotched snakehead fish (*Channa maculata*) without the written permission of the Director.

### **Guide to Public Ponds**

A guide to public ponds, available online, is updated annually with the latest fisheries data. Each pond's information includes: fish populations, vegetation conditions, special regulations and facilities, and a contour map of the pond. This information is available at:  
[www.fw.delaware.gov/fisheries/pages/DelawarePondBooklet.aspx](http://www.fw.delaware.gov/fisheries/pages/DelawarePondBooklet.aspx).

### **Catch & Release**

Many freshwater anglers practice catch and release fishing. This behavior, popularized by bass anglers, promotes the release of fish by anglers so the fish can be caught again. A long-term bass tagging study in Delaware has demonstrated many tagged fish are caught, released, and caught again – a few as many as four times. The Division strongly encourages catch and release fishing to maximize angling success - unless a fish population is known to be over crowded.

Jared Jacobini

## Non-tidal Fishing Access Areas

### Division of Fish and Wildlife

Area Location	Acres	Boat Ramp	Shore Fishing
1 Becks Pond (No gas motors)	25	Yes	Yes
2 Garrisons Lake	86	Yes	Yes
3 Masseys Mill Pond	30	Unimproved	Limited
4 Moores Lake	27	Yes	Yes
5 Derby Pond	23	Yes	Yes

32 Killens Pond	75	Unimproved	Yes
36 Trap Pond	107	Yes	Yes
37 Trussum Pond	73	Car top only	No
38 Raccoon Pond	14	Car top only	Yes

“Area” number refers to the numbered red or brown boxes on the Fishing Areas map (see fold-out).

## 24th Annual Youth Fishing Tournament

As part of its activities for National Fishing Week, June 5-13, the Delaware Division of Fish and Wildlife will hold its 24th annual Youth Fishing Tournament from 10 a.m.-1 p.m., Saturday June 12. The event will take place at Ingrams Pond in Millsboro, Wyoming Pond in Town Park, Wyoming, and at the Lums Pond State Park dog training area.

This fishing event is for youths ages 4 to 15. An adult must accompany youths under age 12 and contestants should bring their own fishing equipment. The tournament is **free** to the public and prizes will be awarded in three age groups: 4-7; 8-11; and 12-15.

The tournament was established to introduce youth to the sport of fishing and to teach the catch and release approach to conservation. There is no pre-registration nor entrance fee required and the tournament is held rain or shine.

In addition to the fishing tournament celebrating National Fishing Week, the Division has designated June 12 and 13 as free fishing days when anyone may fish in Delaware's waters without a fishing license.

Joanna Wilson

### Delaware's Small Pond Program

The Division has 9 small ponds scattered throughout the State which offer shore angling targeted at youth. The ponds range from ½ to 8 acres and contain good populations of largemouth bass and bluegill. Catch and release is the order of the day so barbless hooks are required at most locations. A brochure listing the pond locations and available facilities is available online ([www.fw.delaware.gov/fisheries](http://www.fw.delaware.gov/fisheries), click on 'Small Pond Brochure' under *Info for Anglers*) or by calling 302-735-8650.

Joanna Wilson

## What's New for 2010

**Electronic Licenses and stamps** - All 2010 licenses and stamps will be sold in an electronic format. This means that trout stamps will be distributed as an electronic image. The trout stamp image must be signed across the face to be valid. For further details, see page 9.

**Largemouth bass** – The Division has removed the slot limits for largemouth bass from Derby Pond, Hearn's Pond, and Andrews Lake. These ponds will now be governed by the statewide minimum size limit of 12 inches for bass and 6 per day possession limit.

The minimum size limit of bass in Becks Pond remains at 15 inches and 2 bass per day.

**Black drum** – Delaware has developed a joint management plan with New Jersey for black drum to conserve this important resource. The 16 inch minimum size and 3 fish creel limits apply only to drum landed from the Delaware River and Bay.

**Weakfish** (sea trout) – Stocks of weakfish continue to decline throughout their range along the East Coast. New restrictions for weakfish have been adopted to reduce fishing mortality. All states have adopted a 1 fish per day possession limit. In Delaware the 13-inch minimum size remains the same.

**Winter flounder** – The daily possession limit for winter flounder was reduced to 2 fish per day to comply with new interstate management measures. The new regulations were designed to reduce harvest by 65% and reduce directed fishing.

## General Tidal Fishing Regulations

These are some of the regulations that all anglers should be familiar with. For a complete listing refer to the Division's web site or request a copy from the Director's Office. See page 6 for license requirements.

### **Striped bass (*Morone saxatilis*)**

#### **Spawning season**

The spawning season for striped bass in Delaware is considered to begin at 12:01 AM on April 1 and continue through midnight on May 31 of each calendar year. It is unlawful for any person to take and retain any striped bass during the spawning season from the Nanticoke River or its tributaries, the Delaware River and its tributaries to the north of a line extending due east beginning at and including the south jetty at the mouth of the C & D Canal, or the C & D Canal or its tributaries (see map on page 28). Catch and release only during this season; no harvest allowed.

#### **Circle-hooks**

It is unlawful for any person to fish during the striped bass spawning season on any striped bass spawning ground with natural bait using any hook other than a non-offset circle-hook when said hook measures greater than 3/8 inches as measured from the point of the hook to the shank of the hook.

The Division recommends that circle-hooks always be used when fishing natural baits because of their proven ability to reduce hook and release mortality for striped bass and other fish species. The circle-hook's design usually results in fish being hooked in the mouth, simplifying hook removal and reducing injury to the released fish.

#### **Possession limit**

A recreational angler may take no more than 2 striped bass per day (a period of 24 hours) from the tidal waters of this State at a minimum 28 inches unless otherwise authorized (e.g. spawning season or slot limit).

#### **Slot limit season**

In 2009, the Division adopted a new slot-limit during July and August for striped bass anglers in Delaware waters of the Delaware River, Delaware Bay, and their tributaries. The existing 28-inch minimum size remains in effect in coastal areas.

**Area – Delaware waters only** of the Delaware River and Bay and their tributaries. It does not apply to adjacent waters of Pennsylvania or New Jersey, nor does it apply to coastal waters, Indian River Inlet or the Inland Bays.

Season – July 1 – August 31

Size Limit – 20 inches to 26 inches (total length)

Limit – two (2) per angler

Special Conditions –

- ◆ Recreational hook-and-line fishermen only;

*continued on page 19*

- ◆ Slot limit applies only to the area specified above;
- ◆ Any striped bass less than or greater than the slot size must be released during this special season within the specified area. The 28-inch minimum size is in effect during all other months.

### **American shad and hickory shad**

It shall be unlawful for any person to have in possession more than an aggregate of ten (10) American shad and hickory shad. Additionally it shall be unlawful for any person to take and reduce to possession any American shad or hickory shad from the Nanticoke River or its tributaries.

### **River herring**

Unless otherwise authorized, it shall be unlawful for any person to have in possession, except a person with a valid Delaware commercial food fishing license, more than ten (10) blueback herring and/or alewife (*Alosa aestivalis* and/or *Alosa pseudoharengus*), collectively known as river herring, unless the person has a valid bill-of-sale or receipt for said river herring that indicates the date said river herring were received, the number of said river herring received, and the name, address and signature of the commercial food fisherman who legally caught said river herring; or a bill-of-sale or receipt from a person who is a licensed retailer and who legally obtained said river herring for resale.

No person shall fish with any type of a net, within 300 feet of any constructed dam or spillway on a tidal water river, stream, canal, ditch, or tributary located in this State.

### **Summer flounder**

It shall be unlawful for any person while on board a vessel, to have in possession any part of a summer flounder that measures less than the current minimum size limit between said part's two most distant points unless said person also has in possession the head, backbone, and tail intact from which said part was removed.

The 2010 size limit is four fish at 18 1/2 inches with a season from January 1 through October 12, 2010.

### **Electric lights**

“Lights used for illumination for visual purposes” shall mean any light that is fixed in position anywhere directly above the hull or deck of a vessel, dock or shore area, or any electric flood light less than 500 watts and fixed in position no less than ten (10) feet directly above the surface of the water. An electric flood light is any electric light that does not have a focused beam.

It is legal for any person to fish in the tidal waters of this State with the aid of “lights used for illumination for visual purposes”.

## Division of Fish and Wildlife Tidal Fishing Access Areas

Area Location / Water Body	Boat Ramps	Fishing Piers	Parking
1 7th Street Park / Christina, Brandywine and DE Rivers	Closed	1	20
2 Newport Boat Ramp / Christina River	2	none	51
3 Churchmans Road / Christina River	1	none	20
4 Fort DuPont State Park / DE River	3	none	100
5 Canal Wildlife Area / C&D Canal	none	8 .. along road	
6 Augustine Beach / DE River	2	1	100

24 Edward R. Koch / Broad Creek (shoreline fishing only)	none	none	10
25 Laurel below Records Pond / Broad Creek	none	1	17
26 Assawoman Wildlife Area / Little Assawoman Bay	2	2	20
<b>Parks &amp; Recreation Areas</b>			
33 Cape Henlopen Fishing Pier	none	1	75
34 Indian River Marina	2	No	40
Indian River Inlet	none	along inlet	200
35 Holts Landing/ Indian River Bay	1	Yes	25

“Area” number refers to the numbered yellow or brown boxes on the Fishing Area map.

Note – All motor boats launched from tidal access areas administered by the Division of Fish and Wildlife must be registered in Delaware or have a valid ramp certificate. Ramp certificates cost \$35 and are available from the Division of Fish and Wildlife or authorized agents (see page 40). **A daily or seasonal fee may be required at areas administered by the Division of Parks and Recreation.**

## Surf Fishing

The Division of Parks and Recreation surf fishing beaches are Beach Plum Island, Cape Henlopen State Park, Delaware Seashore State Park, and Fenwick Island State Park. Special restrictions and regulations apply to these areas. For more information contact the Division of Parks and Recreation (302) 739-9220.

In order to drive a vehicle on a designated State Park beach, a SURF FISHING VEHICLE PERMIT is required. Only four-wheel drive vehicles with a minimum ground clearance of seven inches that are licensed to operate on public roadways are eligible for Surf Fishing Vehicle Permits. Permit holders must be actively engaged in surf fishing while on the beach. Permits are available at State Park offices, various license agents, and at the DNREC main office in Dover. Purchasers of Surf Fishing Vehicle Permits will receive additional rules and safety requirements. The revenue collected from these permits supports the management of seashore State Parks and beaches. None of the proceeds from these permits go towards fisheries management programs or fishing access projects conducted by the Division of Fish and Wildlife.

## Boating Safety

### Education

Anyone born on or after Jan. 1, 1978 must successfully complete an approved boating safety course before operating a motorboat and/or Personal Watercraft (PWC) in Delaware. Approved courses are a State of Delaware sponsored course, a U.S. Coast Guard Auxiliary course, a U.S. Power Squadron course, Delaware Safety Council or any other state course which is approved by the National Association of State Boating Law Administrators and DNREC.

Four Leading Causes of Boating Fatalities in Delaware Waters are:

1. Not wearing a PFD or wearing it unzipped
2. Collision (including PWC accidents)
3. Capsizing
4. Alcohol

### Alcohol

Just as drinking and driving don't mix, drinking and boating are a dangerous combination. Sun, glare from the water, constant boat motion and boat vibration all contribute to boater fatigue. Add alcohol consumption and those

problems are compounded. Additionally, alcohol affects balance and muscle coordination, causes tunnel vision and slows reaction time. It also affects reasoning and increases the tendency to take risks.

Operating a boat under the influence of alcohol or drugs is against the law and could result in fines up to \$1,000 for first offense and/or up to 60 days in jail. A blood alcohol content of .08 or greater constitutes being under the influence.

### Registration, Numbering and Marking of Undocumented Vessels

Vessels equipped with any type of motor must be registered in Delaware if principally used (a period of more than 60 days) in this State. The registration card or valid temporary registration card must be on board when the boat is in use. For further information on boating registration call: (302) 739-9916.

### Personal Flotation Devices (PFDs)

In addition to the carriage requirements listed, a PFD must be worn by a child 12 years old or under while aboard a boat which is underway and all PWC riders. Current regulations require all vessels to carry a wearable Type I, II, III, or V PFD for each person on board and a throw cushion type IV for the boat, excluding boats less than 16'. The Boating Education Office suggests all vessels carry a type IV, throwable with a line attached for casting, and that you wear your life jacket zipped.

### Negligent Operation

Skippers on Delaware waters are legally responsible for damages to life, limb or property caused by his/her vessel. And, of course, negligent operation is illegal.

## Boating Safety

### Safe Boating Speed

The speed of all vessels on Delaware waters must be slow enough to prevent any wake of appreciable height when the vessels are within 100 feet of: “Slow-No-Wake” speed areas, docks, launching ramps, marked swimming areas, swimmers, anchored, moored, or drifting vessels.

Every year people are killed or seriously injured in boating accidents in Delaware’s waters. All of these accidents were avoidable if the ‘rules of the road’ had been followed and safe boating practices had been adhered to. The Handbook of Delaware Boating Laws and Responsibilities is available at no cost by contacting the Enforcement Section of the Division of Fish and Wildlife (1-302-739-9915) or through our website [www.fw.delaware.gov](http://www.fw.delaware.gov).

The Enforcement Section of the Delaware Division of Fish and Wildlife is responsible for enforcing all of the safe boating laws as well as making sure that fish and shellfish size and creel limits are being followed. Some of the waters of the State are also patrolled by other authorities such as police officers and the U.S. Coast Guard. Boaters approached by a patrol boat with its blue light flashing should reduce speed, yield the right of way to the patrol boat, or if necessary stop your vessel. The operator must stop when requested to do so by a law enforcement officer.

The safety equipment and requirements for Delaware boaters vary depending on the type and length of the vessel. Here is an example of what is required of a typical fishing boat from 16 to 26 feet in length. For a complete list of all requirements for all size vessels contact the Enforcement Section.

- ◆ Boater Safety Education Card (for all operators born after January 1, 1978). For information contact 739-9915 or go to our website.
- ◆ Valid Boat Registration Card
- ◆ Valid Boat Registration decal (displayed)
- ◆ Personal Floatation Device(s) – one of the appropriate size for each person on-board
- ◆ Type IV throwable PFD
- ◆ Type B-I Fire Extinguisher
- ◆ Flame Arrestor
- ◆ Ventilation System for fuel vapors
- ◆ Horn, Whistle, or Bell
- ◆ Visual Distress System (day and night)
- ◆ Navigational Lights

It is the responsibility of each vessel operator to observe the rules of the road and the carriage requirements. The Division recommends boaters wear their life jacket at all times while on the boat. Six out of ten boating fatalities could be prevented by boaters wearing their lifejackets. The consistent use of lifejackets will save more lives.

## Invasive Species

Every week it seems that a new alien species has invaded our waters, often with detrimental effects on our native species. Anglers can help by serving as extra eyes on the water. Always be aware of unusual fish, plants or even shellfish in our waters. If you see something that you feel is very unusual, please contact us at: 302-739-9914. If you catch any of the species described below, do not return it to the water, kill it and contact one of the Division's field offices or a Fish & Wildlife Enforcement Office. Document the catch by either freezing the fish or taking a good photo.

### Northern Snakehead Fish

This fish has become established in the Potomac with unknown impacts on native fish. It is a long,

cylindrical fish, with long dorsal and ventral fins, and a large mouth with many sharp teeth. They prefer weedy ponds and streams. No snakehead has been confirmed in Delaware.

### Flathead Catfish

PA Fish & Boat  
Comm.

The flathead catfish has been reported from the Schuylkill River, PA and the main stem of the Delaware River, PA. They are most easily recognized by their flat head profile, blotchy black and brown coloration, and a lower jaw which sticks out well beyond the upper. They grow quite large and prey on a variety of native fishes.

## Zebra & Quagga Mussels

These two closely related freshwater mussels can survive out of water for almost 5 days and are easily transported from place to place by human activities. They attach to anything in the water impeding even other animals such as crayfish. Look for the light and dark bands of color on the shell. None confirmed in Delaware.

## Chinese Mitten Crab

First found in the Chesapeake Bay in 2006, a number of crabs have also been reported from Delaware waters. They are most easily identified by their fuzzy claws and a notch between the eyes. The body of the crab grows up to 4 inches across. This crab could be found in non-tidal freshwater as well as saltwater.

## Shellfish

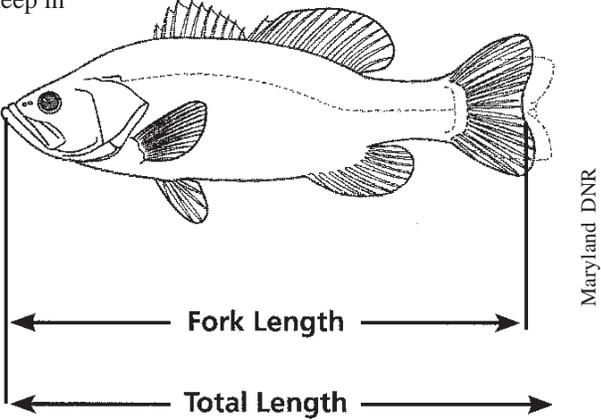

### Minimum Size, Creel Limits & Seasons

Species	Open Season	Min. Length (Inches)	Daily Limit
Blue crab (pots) (fishing license required)	March 1 – Nov.30		1 bushel/crabber
	Peeler	3.0	
	Soft-shell	3.5	
	Hard shell	5.0	
Hard Clams (fishing license required)	all year	1.5	100 resident
	all year	1.5	50 non-resident
Lobster	all year	3 3/8" to 5 1/4" max	2 per diver

## Measuring Your Catch

Place the fish on a measuring board or stick with the tip of the jaw or snout (the mouth closed) at the end of the instrument. Hold the head down with one hand to keep the fish in place, pinch the upper and lower lobes of the tail together while swiping the tail back and forth across the board. Note the measurement of the longest part of the tail\*; that is the “total length”. Keep in mind that fish which barely make the minimum length may shrink after being on ice for an hour or more. Sometimes it is possible to get an accurate measurement while the fish is still in the landing net.

\*When measuring black sea bass do not include the long caudal fin filament in your measurement of total length.

## Non-Tidal Waters Delaware's Recreational Season, Size and Creel Limits

Species	Open Season	Minimum Size	Daily Limit
 <b>Largemouth bass</b> Exception: Becks Pond	All year	12 inches 15 inches	6 2
 <b>Smallmouth bass</b>	All year	None between 12-17 inches	6 no more than 1 over 17 inches
 <b>Striped bass hybrid</b> Only in Lums Pond	All year	15 inches	2
<b>Panfish</b>	All year	None	50 No more than 25 of one species
 <i>Black crappie</i>			
 <i>Pumpkinseed</i>			
 <i>Yellow perch</i>			
 <i>Bluegill</i>			
 <i>White perch</i>			
 <i>Redear sunfish</i>			
 <b>Trout</b> Special rules apply See pg 9	Opens first Saturday in April	None	6 4, fly-fishing waters only

## Tidal Waters Delaware's Recreational Season, Size and Creel Limits

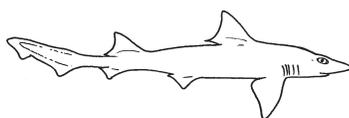

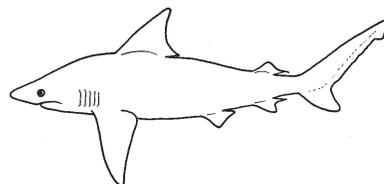

Species	Open Season	Minimum Size	Daily Limit
 <b>American eel</b>	All year	6 inches	50
 <b>American &amp; hickory shad</b>	Closed Nanticoke River & its tribs.; open all year elsewhere	None	10 in any combination
 <b>Atlantic croaker</b>	All year	8 inches	None
 <b>Black drum</b>	All year	16 inches	3
 <b>Black sea bass</b>	Opens May 22; closing date TBA	12.5 inches	25
 <b>Bluefish</b>	All year	None	10
 <b>Catfish (any species)</b>	All year	None	None
 <b>Red drum</b>	All year	only fish 20-27 inches may be retained	5
 <b>River herring (alewife &amp; blueback)</b>	All year	None	10
 <b>Scup</b>	All year	8 inches	50
 <b>Spanish mackerel</b>	All year	14 inches	10
 <b>Striped bass</b> "Catch & Release" only on spawning grounds, April 1 - May 31. See pg 18	All year	28 inches, except only 20-26 inch fish may be retained from July 1 - Aug. 31 in DE River, DE Bay & their tribs.	2
 <b>Summer flounder</b>	Jan. 1 - Oct.12	18.5 inches	4
 <b>Tautog</b>	April 1 - May11 July 1 - Aug. 31 Sept. 29- Mar.31	15 inches 14 inches 14 inches	3 10 10
 <b>Weakfish</b>	All year	13 inches	1
 <b>White perch</b>	All year	8 inches	None
 <b>Winter flounder</b>	Feb 11 - Apr. 10	12 inches	2
<b>Shark, tuna &amp; billfish</b>	Consult guide or <a href="http://www.fw.delaware.gov">www.fw.delaware.gov</a>		

## Common Sharks of Delaware Bay

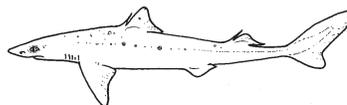

**Sand Tiger** - *Odontaspis taurus* - Gray-brown to tan with dark spots. Length to 10.5 feet. First and second dorsal fins nearly equal in size. Teeth long, curved and not serrated. Protected species, **none may be retained**.

**Sandbar Shark** - *Carcharhinus plumbeus* - Also known as the brown shark. Color dark gray to brown on back, fading almost to white on belly. A heavy-bodied shark with a large first dorsal fin that begins at a point located at the middle of the pectoral fin. **None may be retained**.

**Smooth Dogfish** - *Mustelus canis* - Known locally as the sand shark, this harmless species is common in the Delaware Bay. Gray to gray-brown and ranging up to 5 feet in length. Large first and second dorsal fins, with “sandpaper-like” teeth.

**Spiny Dogfish** - *Squalus acanthias* - Easily identified by a sharp spine located at the leading edge of both the first and second dorsal fins. Commonly caught in cold water by anglers targeting mackerel or striped bass.

## Shark Regulations for Delaware

Many species of sharks have been overfished. A new state/federal shark management plan has been adopted to reduce fishing mortality on many species.

Several species of sharks commonly occur in Delaware waters and are hooked by recreational anglers either targeting sharks or incidentally while fishing for other species. In near-shore areas, these include the smooth and spiny dogfish, sandbar shark (also called brown sharks), and the sand tiger shark. In coastal waters and typically further off-shore in federal waters, some of the large coastal sharks include, but are not limited to, shortfin mako, blue shark, common thresher, and hammerheads.

Sharks are managed by the National Marine Fisheries Service and the Atlantic States Marine Fisheries Commission, and the regulations are complex. For more detailed information on the shark management plan, contact the NMFS or visit their web site. For a waterproof shark identification color placard, contact NOAA at (301) 713-2347 or karyl.brewster-geisz@NOAA.gov.

Species of sharks that can be retained	
No Closed Season	Season closed May 15 – July 15
Shortfin mako	Tiger shark    Scalloped hammerhead
Porbeagle	Nurse shark    Smooth hammerhead
Blue shark	Lemon shark    Great hammerhead
Oceanic white-tip shark	Blacktip shark    Silky shark
Thresher shark	Spinner shark
Finetooth shark	Bull shark
Blacknose shark	
Atlantic sharpnose shark	<i>These species may not be retained in Delaware, New Jersey Maryland, and Virginia from May 15 through July 15.</i>
Bonnethead	
Smooth dogfish	
Spiny dogfish	

For most fishermen in Delaware, the following outline should be sufficient to comply with the new shark regulations. Of the many species of sharks that could occur in Delaware waters, only the species listed in the table can be retained; all other shark species must be immediately released. Species that can be retained and seasonal closures are listed in the above table.

**Size limits** – The minimum size for the sharks listed that can be harvested is 54 inches FORK LENGTH excluding Smooth and Spiny dogfish, Atlantic Sharpnose, Blacknose, Finetooth and Bonnethead for which there are no minimum size limits.

**Possession Limits** (not including dogfish) –

**Boat anglers** – one per vessel for sharks listed that can be harvested plus one additional Bonnethead and one additional Atlantic sharpnose per angler on board the vessel.

**Shore anglers** – one per angler for the sharks listed that can be harvested plus one additional Bonnethead and one additional Atlantic sharpnose per angler.

**Sandbar and Sand Tiger Sharks** – Of special significance to Delaware anglers are the sandbar shark, sometimes referred to as the “brown” shark, and the sand tiger shark. Both species are very long-lived, have low reproductive rates, and are overfished. Delaware Bay is an important “pupping area” and nursery for sandbar and sand tiger sharks, and they are commonly hooked. Sandbar sharks and sand tiger sharks cannot be retained at any time regardless of size.

**Smooth and Spiny Dogfish** – These two species are the most common sharks found in Delaware. Smooth dogfish are typically caught during the warmer seasons with spiny dogfish most abundant during the fall and winter months. Spiny dogfish are not currently overfished and have liberal landing quotas. There is no closed season, no size limit, and no creel limit for spiny dogfish taken by recreational boat or shore anglers in Delaware.

**Federal regulations-** state regulations are subject to changes in Federal Regulations. Please consult [www.fw.delaware.gov](http://www.fw.delaware.gov) for the latest changes in regulations.

## First State Research Vessel & Trawl Programs

The R/V ‘First State’ is the largest of several Division research vessels used to conduct marine fisheries research in the Delaware Estuary. The primary role of the ‘First State’ is to conduct the Division’s two trawl surveys in the Delaware Estuary to monitor juvenile and adult fish and shellfish abundance. These surveys provide information on the relative abundance, distribution, and size/age structure of a wide variety of species – from weakfish and flounder to blue crabs and horseshoe crabs. These data are combined with information gathered in similar surveys conducted by other agencies along the coast and used to monitor, assess and manage our fishery resources.

The surveys are also used to collect specimens for such things as genetic, contaminant, food habit, and tagging studies. Other uses of the vessel include oyster population monitoring and restoration, artificial reef site evaluation and benthic mapping.

## DuPont Nature Center

Chris Bennett

**The DuPont Nature Center** at the Mispillion Harbor Reserve is located at the mouth of the Mispillion River on the Delaware Bay. This harbor represents one of the most

important horseshoe crab spawning beaches and shorebird feeding areas in the world. Each year, thousands of horseshoe crabs mate and lay millions of eggs on beaches visible from the DuPont Nature Center's observation deck. The eggs are a critical food source for migratory shorebirds, including the remarkable Red Knot, which stops at the Delaware Bay each spring on its 9,000-mile flight from Tierra del Fuego (South America's southernmost tip) to its summer nesting grounds in the Arctic.

The center includes an observation deck with spotting scopes to view the harbor, bay and shoreline. More than 130 species of birds, fish, shellfish, and other animals populate the area. Inside the center visitors can view shorebirds and horseshoe crabs along the shoreline more than 100 yards away, courtesy of a remote camera and a 42-inch plasma viewing screen.

The center is filled with exhibits devoted to the Delaware Bay's natural history and ecology including a live sturgeon exhibit. To learn more about the DuPont Nature Center, call 302-422-1329 or visit [www.dupontnaturecenter.org](http://www.dupontnaturecenter.org).

## State Record Holders

Freshwater			
Species	Weight	Angler	Year
Largemouth bass	10 lbs. 5 ozs.	Tony Kaczmarczyk	1980
Smallmouth bass	4 lbs. 15.5 ozs.	Jerry Proffitt	1989
Striped bass hyb.	13 lbs. 13 ozs.	Earl Blevins	1990
Bluegill	2 lbs. 10 ozs.	Arnold Harmon	1998
Carp	45 lbs.	Ronald Burnett	1976
Catfish	23 lbs. 6 ozs.	William Ridgley	1992
Crappie	4 lbs. 9 ozs.	Marvin Billips	1976
Tiger musky	15 lbs. 2 ozs.	Richard Harris	1991
White perch	2 lbs. 9 ozs.	Wayne Hastings	1997
Yellow perch	2 lbs. 11 ozs.	Marvin Kessinger	1976
Chain pickerel	7 lbs. 3 ozs.	Earl Messick	1972
American shad	6 lbs. 12 ozs.	Bayard Conaway	1972
Trout	11 lbs. 10 ozs.	Edwin Wallace	1997

True albacore	80 lbs.	David Francella	1987
Black seabass	7 lbs. 6 ozs.	Steve Samluk	1988
Striped bass	51 lbs. 8 ozs.	Betty Rosen	1978
Bluefish	21 lbs. 15 ozs.	Bill Thoroughgood	1980
Cod	44 lbs.	John Osborne	1975
Atlantic croaker	5 lbs. 3 ozs.	Catherine Simpson	1980
Dolphinfish	52 lbs. 15 ozs.	Charles Ciociola	2003
Black drum	115 lbs.	Kenneth Smith	1978
Red drum	75 lbs.	James Vandetti	1976
Flounder	17 lbs. 15 ozs.	William Kendall	1974
Kingfish	4 lbs.	Billy Hastings	1973
Atlantic mackerel	3 lbs. 5 ozs.	Ricky Yakimowicz	1985
King mackerel	48 lbs. 9 ozs.	Gordon Harris	1992
Spanish mackerel	6 lbs. 4 ozs.	Eric Ludwig	2000
Blue marlin	820 lbs.	Bruce King	1986
White marlin	120 lbs.	William Garner Jr.	1972
Scup	5 lbs. 5 ozs.	Herman Schmidt	1979
Shark	825 lbs.	Brent Thomas	1981
Mako shark	975 lbs.	Thomas Barnes	2000
Sheepshead	14 lbs. 4 ozs.	Fallyn Smith	2008
Swordfish	276 lbs. 12 ozs.	Albert Scott	1978
Tautog	21 lbs. 4 ozs.	Glenn Cave	2005
Gray triggerfish	5 lbs. 12 ozs.	Brent Stewart	2005
Tuna	873 lbs.	Dan Dillon	2005
Wahoo	98 lbs.	Jeff Murtoff	2003
Weakfish	19 lbs. 2 ozs.	William Thomas	1989

See Pages 36 and 37 for more information on the Delaware Sport Fishing Tournament

## Rules for Delaware Sport Fishing Tournament

Call (302) 735-2960 for tournament information.

1. The Sport Fishing Tournament is open to the public. There is no entry fee. Charter boat captains are eligible. Weighmasters are eligible to enter, provided their fish are weighed in at a weighing station other than their own.
2. All fish entered in the tournament must be caught within the boundaries of the State of Delaware except those caught beyond the three-mile limit in the Atlantic Ocean. Any fish caught outside the three-mile territorial sea must be landed in a vessel leaving from a Delaware port and returning to a Delaware port.
3. All fish entered in the tournament must be caught in a sporting manner with hook and line. No other person may touch the rod or line until the fish is brought within the grasp of the mate.
4. All fish entered in the tournament must be weighed at an official Delaware Sport Fishing Tournament Weigh Station.
5. All fish entered in the tournament must meet the minimum weight requirement as set up for this year's tournament.
6. All scales used to weigh in fish must be certified yearly by the Delaware Division of Weights and Measures (Department of Agriculture).
7. No smallmouth bass will be recognized from Kent or Sussex Counties unless Division of Fish and Wildlife qualified personnel examine and approve the catch.
8. A fish will not be recognized as a state record unless qualified personnel from the Division of Fish and Wildlife approve the catch. In case no Division personnel are available at the time of the weigh-in, the angler must save the entire fish for examination and approval at the earliest convenient time for the Division.
9. In the case of a tie for the largest fish of the year or a new state record, both fish will be recognized.
10. To replace a record for a fish weighing less than 25 pounds, the replacement must weigh at least 2 ounces more than the existing record. To replace a record for a fish weighing 25 pounds or more, the replacement must weigh at least one-half of 1 percent more than the existing record. Example: at 100 pounds the additional weight required would be 8 ounces. Any catch that exceeds the existing record by less than the amount required to defeat the record will be considered a tie.

11. The Tournament Director reserves the right to disqualify any entry.
12. All entry forms must be filled out completely and in a legible manner by the weighmaster. **The signed forms should be mailed in by the angler.**
13. The tournament runs from Jan. 1-Dec. 31. No entry forms for the previous tournament year will be accepted after 4:30 p.m. January 31.
14. Only one citation per species of fish will be issued to any individual during the tournament year. In the event an individual catches a larger fish than the one for which he originally was issued a citation, a new citation will be issued for the larger fish if the individual returns the original citation.
15. Only one saltwater award and one freshwater award will be issued to any one individual during the tournament year.
16. Special citations will be issued upon approval of the tournament director in the case of unusual catches or extenuating circumstances (young children, disabled, etc.). If the weigh station feels the catch is rare or unusual, an entry form should be submitted for approval. All decisions by the Director on unusual species will be final.
17. Citations will be awarded for released white or blue marlin. Fill out the standard entry form except for length, weight, and girth and include a signature and telephone number of a witness to the catch other than the angler and captain. Any marlin kept for mounting also will be eligible for Tournament entry provided a taxidermist receipt is enclosed with the entry form. Marlin retained for any purpose other than mounting will not be eligible for entry in the Tournament.
18. The Tournament Director reserves the right to disqualify any weigh station if the Tournament rules are not observed.
19. Hybrid striped bass will only be recognized for entry when caught in Lums Pond.
20. The State of Delaware assumes no responsibility in the certification of a catch for consideration by the International Game Fish Association or any record keeping body other than the Delaware Sportfishing Tournament. If the angler wishes to qualify his catch for consideration in some other tournament, it is the responsibility of the angler to insure that his catch and weigh-in meets the appropriate criteria. The Delaware Sportfishing Tournament makes no distinction based on line classes or sex of the angler or fly versus conventional fishing gear.

## Live Release Awards

In order to promote conservation ethics among Delaware anglers, the Division of Fish and Wildlife is providing recognition patches to anglers who catch and release live eligible species that exceed the minimum lengths specified. To qualify, an angler must make the catch in Delaware waters or off Delaware's Atlantic coast line. The eligible species must be measured from the tip of the jaw to the tip of the tail (straight line measurement with mouth closed) and this measurement must be verified by a witness who signs the entry form. The fish so measured must be released immediately. Fish kept either alive or dead and brought to a weigh station will be weighed for entry in the Sport Fishing Tournament using certified scales and will not be eligible for a Live Release Award. Only those fish released alive immediately shall be eligible for a Live Release Award. Billfish released alive are eligible for either the Live Release Award or the Sport Fishing Tournament Award, whichever one the angler chooses.

No angler will be issued more than one live release freshwater award and one live release saltwater award per year, although he or she may apply for and receive one of the live release citations for each eligible species.

Applications for Live Release Awards are available on-line or may be picked up at any Sport Fishing Tournament Weigh Station and must be mailed to the Division of Fish and Wildlife within 30 days after the catch. The entry form for live releases must include both the angler's signature and the signature of a witness to the actual measurement and live release of the fish. No fish entered for a Live Release Award will be eligible for consideration as a State record fish. All potential State record fish must be weighed at a certified Weigh Station.

### Have you seen a sturgeon recently?

If you find a dead sturgeon please report it immediately :  
302-735-8650. Don't forget to include an exact location and contact information in your message.

## Sport Fishing Tournament Minimum Weights

### Freshwater Fishes

Species	Weight (lbs.)	Length* (inches)
Largemouth bass .....	5 .....	20
Smallmouth bass .....	2 <sup>1</sup> .....	17

## Handling and Releasing Fish

Catch-and-release can be an effective way to conserve fish if certain precautions are observed. Whether fishermen choose to release fish or are required to do so by law, care should be taken as to maximize the fish's chance of survival.

- ◆ **Exhaustion** – Long fights can decrease survival due to the build-up of lactic acid in muscular tissues. When practicing catch-and-release fishing, it is prudent to use equipment matched for the size of the fish targeted to minimize these effects. Once landed, the time the fish spends out of water should be minimized and anglers should avoid touching the fish's gills. Unresponsive fish can often be “revived” by forcing water across the gills. This can be accomplished by moving the fish gently back and forth in the water.
- ◆ **Slime Loss** – Fish have a slime coating, which seals out infection. Rough handling can damage this protective coating. Shallow landing nets, preferably rubber or knotless nylon, can greatly reduce excessive slime loss. Anglers should always handle fish with a wet towel or hand, or rubber gloves. Care should be taken to prevent the fish from flopping around and causing further wounds or loss of slime.
- ◆ **Wounds** – Anglers can do a lot to minimize the damage of hook wounds both before and after the fish is hooked. Tools such as de-hookers and needle-nose pliers can help to ensure a quick release. Treble hooks should be avoided when practical. Use fishing lines made of fluorocarbon or braid. The increased sensitivity of these lines will help to detect bites sooner and minimize the chances of hooking fish deep (stomach or gullet). If a fish should swallow the hook, cut the line a short distance above the hook eye. Studies have shown that some fish are able to pass hooks when a short piece of leader is attached. Barbless and circle hooks have both been proven to minimize wounds and time out of water.

## Tuna Regulations

Tuna regulations and permits are available from the National Marine Fisheries Service phone: (888) USA-TUNA Federal web site: <http://www.nmfspermits.com>

## Fish Consumption Advisories

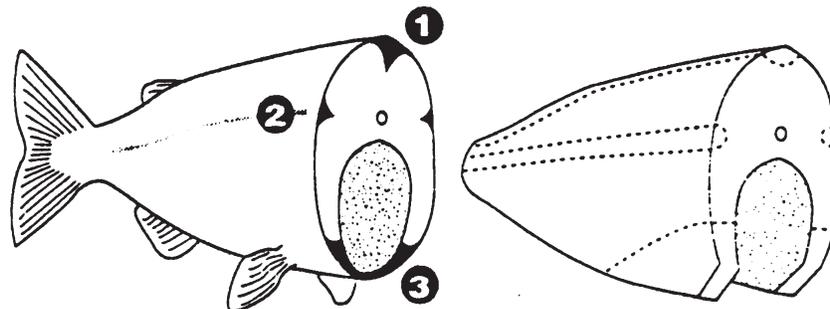

Fishing is an important activity in Delaware's inland and coastal waters. Among the benefits provided by fishing are quality recreational opportunities, direct and indirect input to the local economy, food for recreational anglers, and food for the commercial marketplace. Fish are a good source of readily digestible protein, they are low in fat and sodium, and the unique types of fats found in fish are believed to provide cardiovascular benefits.

Despite the general benefits of fishing and fish consumption, there has been a growing concern regarding the presence of chemical toxins in the flesh of finfish and shellfish taken from Delaware waters and the associated health risk to anglers and their families who consume their catch. The existence of chemicals in the edible portion of some fish has resulted in the public advisories. These advisories are as a result of joint action taken by the Department of Natural Resources and Environmental Control and the Department of Health and Social Service's Division of Public Health. The advisories were deemed necessary because of the nature of pollutants such as polychlorinated biphenyls (PCBs).

Even when present in the water in extremely small amounts, some chemicals tend to build up over time in fish tissue because fish can absorb and concentrate contaminants from food they eat, or to a lesser extent, directly from the water. The amount of contaminants fish accumulate depends on the species, size, age, sex, and feeding area of the fish. Generally speaking, older, larger individual fish accumulate the most contaminants, although in some cases contaminants are shed each time the fish spawn. Since fish accumulate many contaminants in their fatty tissues, certain species with higher oil content can pose more risk than others when both inhabit polluted areas.

For more information concerning health advisories for Delaware waters, go on-line or contact the Division of Public Health at (302) 744-4546.

## Cutting the Fat

Reprinted with permission of Soundings Publication Inc.

Toxic chemicals tend to concentrate in the fatty tissue, shown in black above, found in the:

- 1) dorsal area.
- 2) lateral line.
- 3) belly flaps.

When cleaning fish, always skin it and trim away fatty areas, as shown above.

*continued on page 44*

## Delaware Fish Consumption Advisories ([www.fw.delaware.gov](http://www.fw.delaware.gov))

Waterbody	Species	Contaminant of concern	Geographical Extent	Meals/yr 8 -ounce serving

Christina Creek	Stocked Trout	A, E	Rittenhouse Park to DE/MD Line	6
Designated Trout Streams & Ponds other than Christina Creek	Stocked Trout	A	Designated Trout Streams are listed on pg. 10	12

Notes: ♦ Women of childbearing age and children should not consume any amount of these fish.

For more information on the specific contaminant(s) of concern for each waterbody listed, consult the Division's website ([www.fw.delaware.gov](http://www.fw.delaware.gov)) or contact DNREC at (302) 739-9902, or the Division of Public Health at (302) 744-4546.

Contaminants of concern: A) PCBs, B) Dioxin, C) Mercury, D) Chlorinated pesticides, E) Dieldrin, F) DDT, G) Furan, and H) Chlordane. For more information consult the Division's website or contact DNREC at (302) 739-9902, or the Division of Public Health at (302) 744-4546.

## Blue Crabs

Effective January 1, 2008 a fishing license is required to crab in all waters of the State of Delaware. See page 6.

The blue crab is common in all the tidal waters of Delaware. It is a popular recreational resource and tops the list of the State's economically important marine fish and shellfish.

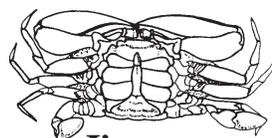

Blue crabs grow very quickly and reach maturity in 12 to 18 months. Most do not live beyond two years under current exploitation levels.

In order to grow, a blue crab must shed its shell and form a new shell. This process is repeated up to 18 times to attain maximum length. It is legal to take crabs at three stages, but to get the most yield in weight out of a crab, they should reach a minimum length before being harvested. This is measured from point to point of the top shell.

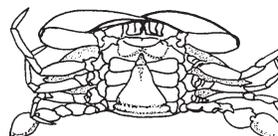

Mature females (sooks) are identified by the rounded apron on their under side. Once this stage of development is achieved, females stop growing. Because a portion of the female population does not reach five inches before achieving maturity, the minimum size requirement has been dropped. Females bearing eggs, commonly known as sponge crabs, may not be taken and should be returned to the water immediately.

Recreational crabbers may use two pots, however the person claiming to own the pots must tend them. These pots must be marked with all white buoys with the owner's full name and permanent mailing address inscribed either on the buoy or on a waterproof tag attached to the buoy. All crab pots must be tended at least once every 72 hours. All crab pots must be removed from the water between December 1 and February 28. Recreational crabbers may use a trot line (no length limit) and any number of hand lines or traps. The recreational daily limit is one bushel per person.

A **by-catch reduction device** is required to be attached in each funnel entrance of a recreational crab pot to reduce the possibility of diamondback terrapins entering and drowning. A by-catch reduction device is a rigid rectangular frame of plastic or metal that measures 1.75 inches x 4.75 inches and is available at local tackle shops, or can be hand-made from heavy wire or other suitable material.

## Clamming

### Methods Of Take And Limits

**A fishing license is required to harvest clams in waters of the State of Delaware. See Page 6 for details.**

It shall be unlawful for any person to attempt to take, catch, kill or reduce to possession any hard clams with a device other than a hand-held rake with a head no wider than fourteen (14) inches measured perpendicular to the tines and a straight handle not in excess of seven (7) feet in length.

It is unlawful to harvest hard clams from one-half hour after sunset through one-half hour before sunrise.

It is unlawful for any resident to harvest more than one hundred (100) clams per day unless otherwise permitted to do so by license or permit.

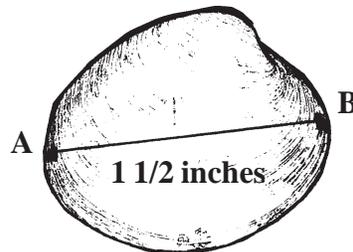

It is unlawful for any non-resident to harvest more than fifty (50) hard clams per day unless otherwise permitted to do so by license or permit.

No shellfish harvesting (excluding crabs) is allowed in the **Prohibited Areas** marked on the map on page 48 and 49 or any tidal river, stream, or impoundment of the state. This includes all non-tidal and impounded water as well. Shellfish harvesting is allowed from December 1 through April 15 in the **Seasonally Approved Areas**. This is your protection against contracting shellfish-borne diseases. This is also the law. All boundaries may be marked with signs and or buoys saying “No Shellfish Harvesting” or “Prohibited Shellfish Area”. Questions regarding these closures should be directed to the Watershed Assessment Section Shellfish and Recreational Waters Programs 302-739-9939. Clamming is prohibited in eel grass beds marked with white PVC pipes and signs.

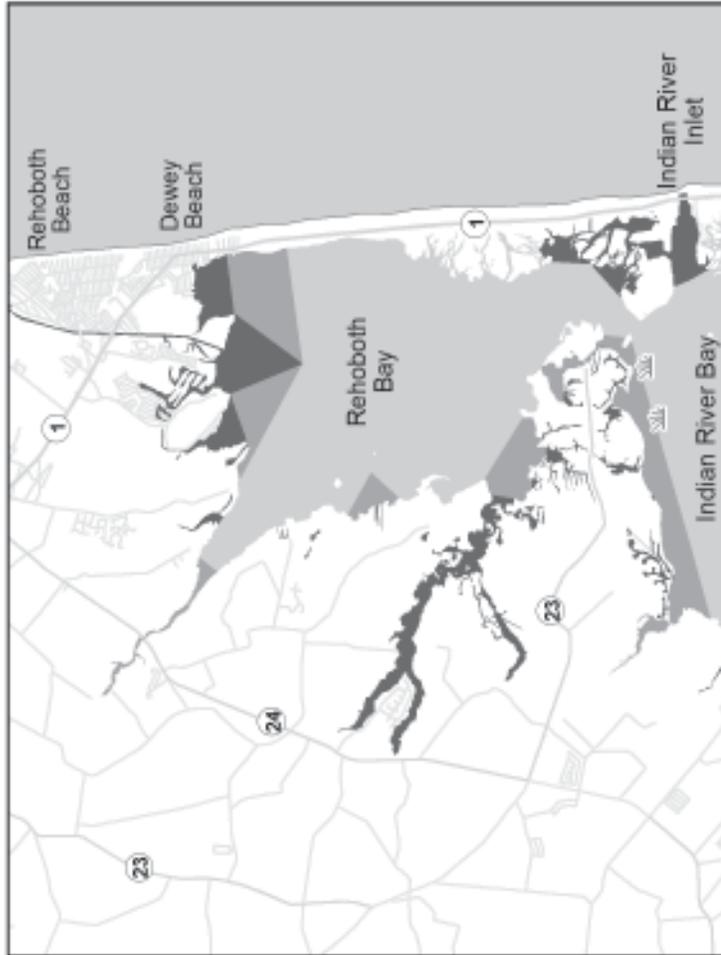

Dave Shirey

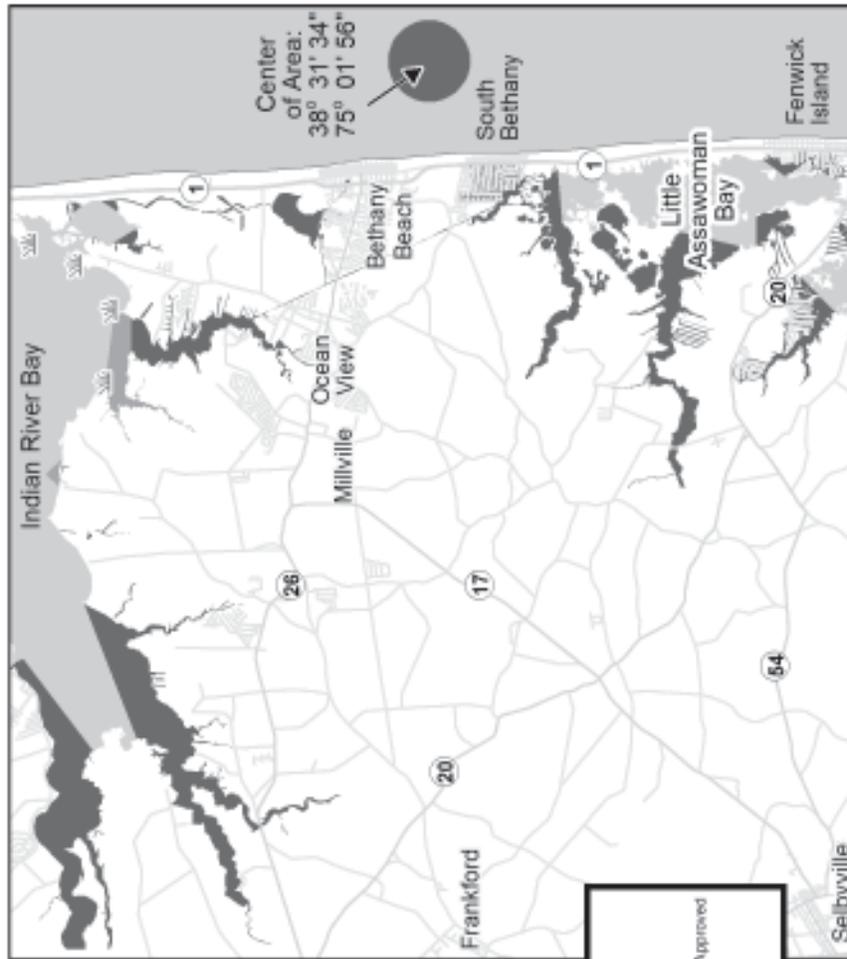

### Minimum Hard Clam Size

The minimum size for a hard clam is 1 1/2 inches from point A to point B.

## Clamming Map

## Artificial Reef Program

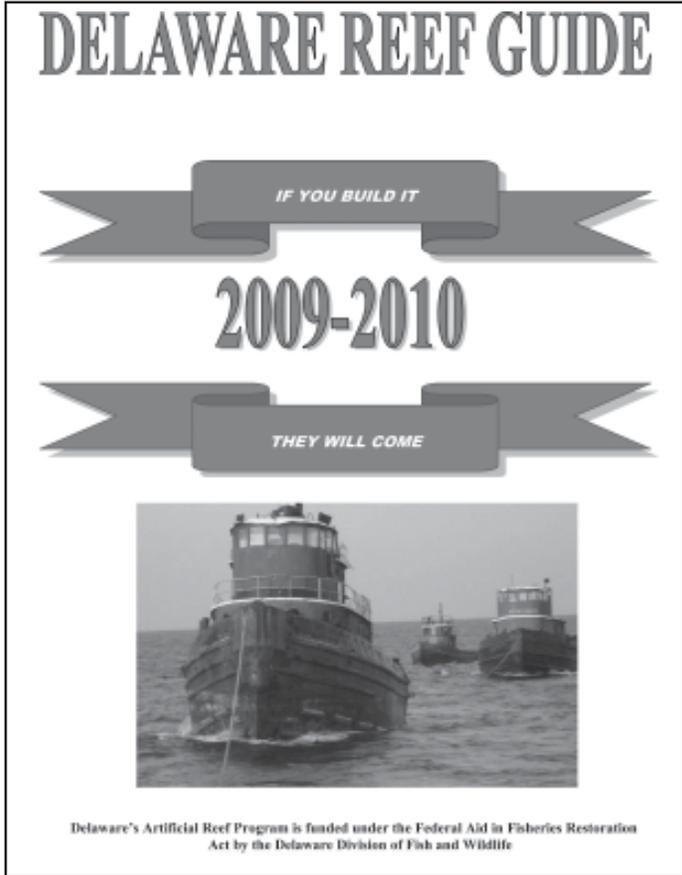

Delaware has eleven permitted artificial reef sites in Delaware Bay and along the Atlantic Coast. Development of these sites began in 1995 and will continue. The Delaware Reef Program is one part of a comprehensive fisheries management effort and is designed to enhance fisheries habitat, benefit structure-oriented fish, and provide fishing opportunities for anglers.

*Decommissioned armored vehicles such as this one are among the recycled materials used to create an artificial reef for marine habitat off Delaware's Atlantic coast.*

The site charts in the free reef guide show where reef materials have been deployed since 1995. The reef program uses DGPS (Differential Global Positioning System) to accurately place materials on site. Locations (latitude - longitude) noted for each site indicate the position of deployments of reef material from an anchored barge. In the case of large, concentrated reef deployments, a latitude or longitude range, may be given such as: N 39 15.377' - 402'. This indicates material occurs between 39 degrees, 15.377 to 15.402 minutes north latitude. Due to variability between DGPS receivers, slight variations in readings may occur. It is suggested you use your GPS and a good fathometer to locate reef structure, then note the coordinates on your own GPS. You can view the reef guide on-line or contact the Fisheries Little Creek field office for a copy (302) 735-2960.

## Fishing Advisory Councils

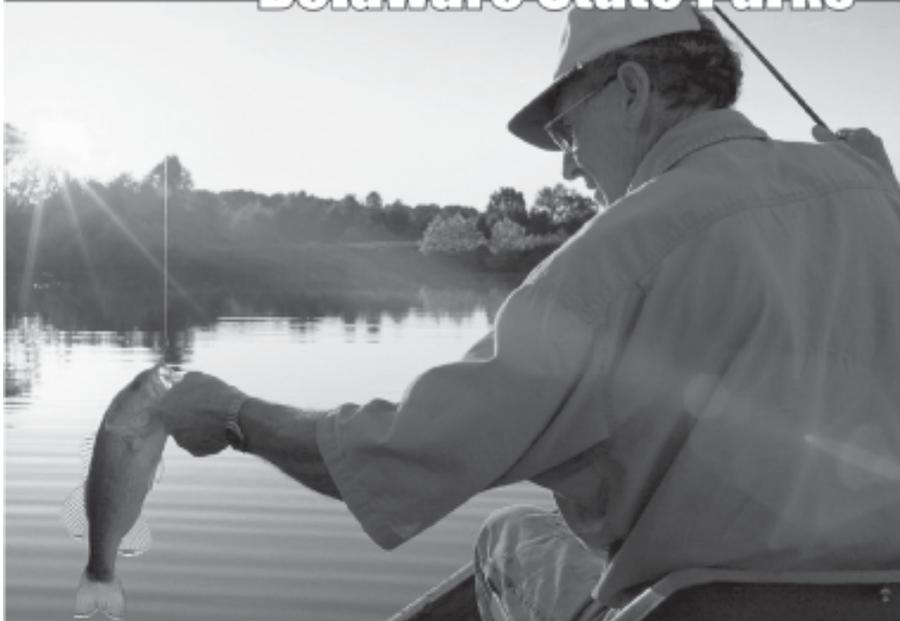

By Delaware law there are four citizen advisory councils with members appointed by the Governor to provide guidance to the Division of Fish and Wildlife on issues associated with fishing and fishery resources. All members serve without compensation. The Council on Game and Fish consists of 9 members and they provide advice on wildlife and freshwater fisheries matters. The Council on Shell Fisheries consists of seven members, at least four of whom represent commercial shellfishing interests, one recreational shellfisherman, and one person knowledgeable in marine fisheries. These two advisory councils have been in existence since the early 1970s. The Advisory Council on Tidal Finfisheries consists of seven members, three of whom represent recreational fisheries interests and three represent commercial fisheries. This council was formed in 1984. Legislation that passed late in 2007 authorized the creation of the newest advisory council, the Council on Recreational Fishing Funding. This seven-member council of citizens with an interest in recreational fisheries also includes two ex-officio members of the General Assembly and a non-voting representative of the Division of Fish and Wildlife. This newest council is charged with advising the Division on construction related priorities for expenditure of funds generated from the sale of recreational fishing licenses.

The length of appointments to these councils varies, but in general is for three years at a time. The various councils meet monthly in the case of Game and Fish and Tidal Finfisheries (except that Tidal Finfisheries does not meet in July, August, and December), quarterly for Shell Fisheries, and once or twice per year for the new Council on Recreational Fishing Funding. The council meetings are held in the Department of Natural Resources and Environmental Control's auditorium on weekday evenings, and the public is encouraged to attend and participate. For more details on meeting schedules of the various advisory councils, check the Division's website ([www.fw.Delaware.gov](http://www.fw.Delaware.gov)) and follow the links for advisory councils.

## Recreational Gill Nets

Gear and seasonal restrictions apply to recreational gill nets and anyone obtaining a permit will be informed of these restrictions. During 2010, all gill nets must be removed from the Delaware Bay and Ocean on the following dates: May 1-10; May 14-16; May 21-23; May 28-31; June 4-6; June 11-13; June 18-20; and June 25-29 in order to reduce weakfish mortality rates as required by the Atlantic States Marine Fisheries Commission's Weakfish Management Plan. Each closure period begins at 12:01 AM on the first day and ends at midnight on the last day. No striped bass caught in recreational gill nets may be retained at any time.
