**Concrete Mixing Operation**

**Plan View**

- **Lined Stone Berm or Compost Log Perimeter**
- **Optional Excavated Area**
- **Mixing Silo**
- **10 mil polyethylene liner**
- **Optional gravel entrance**
- **Optional stone pad**

**Section View**

- **DE #57 stone berm option**
- **12" min.**
- **Excavated area for additional storage (optional)**
- **Sandbag or concrete block anchor**
- **10 mil polyethylene liner**
- **18" compost log option with liner keyed into ground min. 6"**
- **Stone pad for mixing silo (height not to exceed perimeter height)**

**Data to Be Provided**

- Length, l
- Width, w
- Depth, d

**NOTE:** Berm required on all sides (excluding access drive location)

DE-ESC-3.6.3
Sheet 1 of 2
Effective FEB 2019
Construction Notes:

1. Locate concrete mixing and containment area a minimum of 50 feet from open channels, stormdrain inlets, wetlands or waterbodies.

2. Locate concrete mixing and containment area so that it is accessible to telescopic lifts (service with a minimum 10 foot wide gravel or paved accessway), but so it is not in a highly active construction area causing accidental damage.

3. Minimum volume for installed containment areas are 3.5 cubic feet per cubic foot of mixing capacity. The installed containment area must encompass the storage silo and mixing unit, and be surround on three sides minimum by a 12" high stone berm (DE #57) or 18" compost log.

4. The 10-mil poly liner must be free of tears or holes and placed over smooth surfaces to prevent puncturing. The liner shall cover the perimeter control and be secured on the backside using cement or sand bags, or keyed into the ground a minimum of 6".

5. Allow cementitious waste to harden through evaporation of the wastewater. Once the facility has reached 75 percent of its capacity, remove the hardened concrete by reusing the broken aggregate onsite, recycling, or disposing of offsite. The hardened material can be buried on site with minimum of 1 foot of clean, compacted fill.

6. Apply a new liner before reusing the station for additional mixing after maintenance has occurred.
