

DNREC Sediment & Stormwater Listserve Update: November 2010

This month's topics:

- 1. Pre-registration Required: December 1, 2010 Blue Card Class**
- 2. 2011 CCR Course**
- 3. New Security Measures for R&R Building**
- 4. Link of the Month: Technical Document for Proposed Revisions to the Delaware Sediment & Stormwater Regulations**

1. Pre-registration Required: December 1, 2010 Blue Card Class

DNREC will be holding the last Contractor's Certification course (Blue Card) for the calendar year on December 1st, 2010 at the Modern Maturity Center (registration required). The Contractor's Training course is a ½-day course that gives an overview of the Sediment and Stormwater Program, its regulations, and required erosion and sediment control measures in the State of Delaware. Please contact Joanne Gedney by e-mail at Joanne.Gedney@state.de.us or by phone at 302-739-9921 for registration information.

2. 2011 CCR Course

It's time to Mark your Calendar for the CCR Course that will be held in March 2011. The CCR course is offered once a year and the Certification is valid for five years. The 3 ½ day class will be offered on March 2, 9, 16, (mandatory ½ day field trip) and 23, 2011. The course fee is \$225, which includes continental breakfast, lunch and course materials. The participants must attend all 3 ½ days in order to obtain certification, in addition to passing a written exam. Please contact Joanne Gedney by email at Joanne.Gedney@state.de.us for the registration packet.

3. New Public Access to R&R Building

DNREC will be instituting new security measures for the Richardson & Robbins Building in Dover. These new measures are scheduled to take effect in January 2011. Public access will be provided through a central location requiring visitors to sign in and acquire a temporary pass. Additional information will be provided on the DNREC Website as it becomes available.

4. Link of the Month: Technical Document for Proposed Revisions to the Delaware Sediment & Stormwater Regulations

The Sediment & Stormwater Program staff has been forging ahead with the development of the Technical Document that will support the upcoming revisions to the Delaware Sediment & Stormwater Regulations. Although many of the individual documents have already been reviewed and discussed in draft form with the various Subcommittees, they have not been made accessible from a single location. Rather than waiting until all the pieces of the Technical Document have been completed, it was felt that it would be more helpful to the regulated community to access them as they are being developed. It is hoped that this approach will facilitate the adoption of the Technical Document once all the elements have been fully developed. The draft documents currently available for review can be accessed at the following link:
