

INSTRUCTIONS: FORM 2

Notice of Termination (NOT)

for Storm Water Discharges Associated With CONSTRUCTION ACTIVITY Under a NPDES General Permit

<http://www.swc.dnrec.delaware.gov/Pages/SedimentStormwater.aspx>

WHO MUST FILE A NOTICE OF TERMINATION FORM?

The EPA can authorize any State to operate the NPDES program. Delaware received this authority in April 1974. The 1987 amendments to the Clean Water Act require national regulations to be issued for controlling pollutants entrained in storm water discharges.

Under the provisions of the Clean Water Act, as amended, (33 U.S.C. 1251 et seq.; the Act), except as provided by Part I.B.3 of the permit, Federal law prohibits discharges of pollutants in storm water from construction activities without a National Pollutant Discharge Elimination System Permit. A General Permit, as defined by federal law in 40 C.F.R. §122.28, authorizes the discharge of storm water associated with industrial activity from sources within a defined area or that share certain similarities.

In 1993, Section 9 (The General Permit Program), of the State of Delaware, Department of Natural Resources and Environmental Control, Regulations Governing the Control of Water Pollution was issued. Subsection 1 of the General Permits Program contains The Regulations Governing Storm Water Discharges Associated with Industrial Activity and are referred to as the "General NPDES Storm Water Permit Program". In order to obtain coverage through the General NPDES Storm Water Permit Program, persons will be required to file with the DNREC a Notice of Intent (NOI). The NOI requirement is in accordance with 40 C.F.R. §122.28(b)(2) of the USEPA NPDES Program. The NOI is the equivalent of an NPDES permit application for General NPDES Storm Water Permit coverage.

Once the NOI is submitted, General NPDES Storm Water Permit coverage continues until a completed Notice of Termination (NOT) form has been submitted to the Department and it is determined that (1) all items and conditions of the Plan have been satisfied in accordance with the *Delaware Sediment and Stormwater Regulations*, (2) as-built documentation verifies that permanent stormwater management measures have been constructed in accordance with the approved Plan and the *Delaware Sediment and Stormwater Regulations*, and (3) final stabilization has been achieved.

WHERE TO FILE THE NOT FORM

The NOT form must be submitted to the following address:

DNREC, Division of Soil and Water Conservation
Sediment and Stormwater Program
89 Kings Highway
Dover, Delaware 19901

COMPLETING THE FORM

Type or print, using uppercase letters, all information on the form. If you have any questions while completing the application form, please call (302) 739-9921.

SECTION I. PERMIT INFORMATION

Provide the original NOI ID#, date received, and project name as it appeared on the original NOI. This information may be obtained by searching the NOI database available online at the following address: <http://apps.dnrec.state.de.us/noi/searchNoi.aspx>.

In addition, provide the project location, address, county, municipality, if applicable, and tax parcel ID number for the project site location. If the project is comprised of more than one parcel, provide the tax parcel identification number of the largest parcel.

The applicant must provide the latitude and longitude of the center of the site in degrees, minutes, and seconds to the nearest 15 seconds.

SECTION I. PERMIT INFORMATION (continued)

Latitude and longitude given in decimal form must be converted to degrees, minutes and seconds prior to entry on the form. The latitude and longitude of your facility can be located on USGS quadrangle maps. Latitude and longitude may also be obtained at the Census Bureau Internet site:

<http://www.census.gov/cgi-bin/gazetteer>.

Indicate the quantity of each type of permanent stormwater management practice proposed for the site. For practices that will not be used on the site, the space may be left blank or a zero inserted. A description of the primary best management practices follows:

Wet Pond – Pond that always holds water, even during dry periods.

Dry Extended Detention Basin – Basin that holds water during and for up to 48 hours following a rain event, but drains completely during dry periods.

Infiltration – Basin or trench pipe system whose primary means of discharging runoff is into the ground. Infiltration systems should be completely drained within 48 hours following a rain event.

Bioretention – Densely planted, mulched landscaped area that collects runoff and allows it to pond on the surface before overflowing.

Biofiltration/Filter Strip – Wide, flat grassed swale or grassed filter strip that filters pollutants from runoff. Flow through the biofiltration facility is shallow to promote increased grass contact.

Sand Filter – Concrete stormwater quality management structure with two chambers: (1) a sedimentation chamber that fills with runoff and overflows through a weir into (2) a filtration chamber filled with 18 inches of sand prior to discharge into a storm drain system.

Stormwater Treatment Structure – One of many types of pre-engineered structures that may be installed in- or off-line of a storm drain system to capture gross pollutants, suspended solids, petroleum hydrocarbons, etc. prior to discharge into the storm drain system.

If the permanent stormwater practice does not comply with one of these definitions, "Other" may be checked and a brief description of the stormwater management practice provided.

SECTION II. PERMITTEE INFORMATION

Provide the legal name, mailing address, telephone number, and fax number of the firm responsible for implementation of the requirements of the Sediment & Stormwater / Storm Water Pollution Prevention Plan. Provide the full name of an individual representative of the owner/operator.

SECTION III. TERMINATION OF COVERAGE INFORMATION

Enter the construction completion date and certify that (1) all items and conditions of the Plan have been satisfied, (2) as-built documentation has verified that permanent stormwater management measures have been constructed properly, and (3) final stabilization of the site has been achieved. The NOT form should not be submitted until each of those statements may be answered with "Yes".

SECTION IV. CERTIFICATION

State law provides for severe penalties for submitting false information on this application form. **An unsigned or undated Notice of Termination (NOT) form will not be accepted for termination of permit coverage.**

The form certification shall be signed as follows:

- For a corporation: by a responsible corporate officer which means: (i) president, secretary, treasurer, vice-president of the corporation in charge of a principal business function, or any person who performs similar policy or decision making function, or (ii) the manager of one or more manufacturing, production, or operating facilities employing more than 250 persons or having gross annual sales or expenditures exceeding \$25 million (in second-quarter 1980 dollars), if authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures;
- For a partnership or sole proprietorship: by a general partner or the proprietor, or
- For a municipality, state, federal, or other public facility: by either a principal executive officer or ranking elected official.

For Delaware businesses, the form certification shall be signed as follows:

- For a Corporation: by an Authorized Officer (8 Del. C., Chapter 1),
- For a Limited Liability Company: by an Authorized Person (6 Del C., Chapter 18),
- For a Limited Partnership: by a General Partner (6 Del C., Chapter 17),
- For a General Partnership: by a Partner or Authorized Person (6 Del. C., Chapter 15),
- For a Limited Liability Partnership: by a Partner or Authorized Person (6 Del. C., Chapter 15), or
- For a Statutory Trust: by a Trustee (12 Del. C., Chapter 38).

Reference the Delaware Code as listed for definitions of the individuals who may sign for the various business entities.

III. Termination of Coverage Information

Construction Completion Date: ___ / ___ / ___

Have all items and conditions of the Plan been satisfied in accordance with the *Delaware Sediment and Stormwater Regulations*? ___ Yes ___ No

Has as-built documentation verified that the permanent stormwater management measures have been constructed in accordance with the approved Plan and the *Delaware Sediment and Stormwater Regulations*? ___ Yes ___ No

Has final stabilization of the site been achieved? ___ Yes ___ No

IV. Permittee Certification

NOTE: SEE INSTRUCTIONS FOR SIGNATURE REQUIREMENTS

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage this system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

I certify under penalty of law that I understand the terms of and conditions of the Delaware National Pollutant Discharge Elimination System (NPDES) Special Conditions for Storm Water Discharges Associated with Construction Activities.

Print Name: _____ Print Title: _____
