

Update to Technical Document

Date: June 2014

Article: 3.02.1.3

Description: Stormwater Assessment Report (SAR)

Synopsis:

The Stormwater Assessment Report has been updated with the following revisions:

- “Other” category added to mitigation options for “Significant” ratings on Page 1
- Rating Criteria for Assessment Item #2 (Runoff Potential) clarified to be based on the increase in impervious area
- Revisions to Computation Sheet (Page 3)
 - Blanks for “Total site area” and “Total LOD area” added
 - Soils ratings reduced to those properties related to runoff reduction; rating value for Section 1 based on the single property having the maximum acreage
 - Runoff potential rating for Section 2 clarified to be based on increase in impervious area
 - Shaded areas changed to hatched areas to clarify which cells are to be filled in with data
