

News from the DNREC Sediment and Stormwater Program:
DNREC Sediment & Stormwater Listserve Update: May 2007

This months topics:

1. Next Contractor's Training Course
2. Next Recertification Course for Certified Construction Reviewers
3. StormCon Conference, 2007
4. Mid-Atlantic Chapter of International Erosion Control Association Conference, 2007
5. Link of the Month

1. Next Contractor's Training Courses (Blue Card)

This four-hour workshop gives an overview of the sediment and stormwater program, its regulations, and required erosion and sediment control measures in the State of Delaware. The next course will be offered on September 12, 2007, at the Modern Maturity Center in Dover, DE. Please call Joanne Gedney at 302-739-9921 for registration information. The course fee is \$60, which includes continental breakfast and a course book.

2. Next Recertification Course for Certified Construction Reviewers (CCR)

Certified Construction Reviewer certification is only valid for five years; therefore, CCR recertification is offered to those wishing to continue certification. The next one-day refresher will be held on Wednesday, October 24, 2007. The course fee is \$90, which includes continental breakfast, lunch, and a course manual. Please send an e-mail to Joanne Gedney at Joanne.Gedney@state.de.us or call 302-739-9921 to be placed on the waiting list.

3. StormCon Conference 2007

This year's StormCon conference will be held from August 20-23, 2007 at the JW Marriott Desert Ridge in Phoenix, Arizona. For more information, please visit the website at <http://www.stormcon.com/sc.html>

4. Mid-Atlantic Chapter of the International Erosion Control Association 2007

The Mid-Atlantic chapter of the International Erosion Control Association's annual conference will be held in Atlantic City, New Jersey, from September 25-27, 2007. To obtain upcoming registration, please stay tuned to their website at <http://www.macieca.org/>.

5. Link of the Month

North Carolina State University is one of only a handful of higher education institutions actively doing research on some of the latest techniques for managing urban stormwater runoff. Under the direction of Prof. Bill Hunt, the Biological and Agricultural Engineering (BAE) Stormwater Engineering Group maintains a Web site with the North Carolina State Cooperative Extension Service to deliver their latest research and findings. Research subjects include low impact development (LID), rainwater harvesting and green roofs. The Group has been one of the leaders in researching permeable

pavements for stormwater management, including an installation of permeable pavers in Rehoboth Beach, Delaware that was done as a pilot project. Their Web site can be accessed from the following link: <http://www.bae.ncsu.edu/stormwater/>
