RE: Permit Minor Modification  
NPDES Permit No. DE 0000736  
Pinnacle Foods Group LLC

Dear Mr. Spence:

The referenced NPDES permit has been modified to delete reporting of daily average and daily maximum loads for enterococcus. The reporting of loads for enterococcus was required in the final permit effective November 1, 2008. However, the loads for enterococcus are not recognized in EPA's Permit Compliance System (PCS). Also, since the concentration limit for enterococcus is based on the load limit, requiring both is redundant. Copies of the modified permit pages and DMR are attached. The effective date for this minor modification is February 1, 2011, and the permit expiration date remains October 31, 2013.

Please use the modified permit pages to replace the corresponding pages in the current permit and use the attached DMR for future reporting.

Please call me at (302) 739-9946 if you have any questions.

Sincerely,

Anthony E. Hummel, PE  
Environmental Engineer
