RE: Nutrient Offset Plan Report

Dear Mr. Hansen:

This letter serves as the fourteenth installment of the Pinnacle Foods Corporation's Nutrient Offset Plan Report. As required by Special Condition #7 of Pinnacle's NPDES Permit DE 0000736, "The permittee shall submit progress reports every six months outlining actions taken toward implementing this plan".

Spray irrigation operations began on May 8, 2007 and came to a close on September 19, 2007. Over 13.6 million gallons were sprayed on the Reed Canary/Orchard grass site. The field was cut twice in 2007, once in June and once in September. A total of 51.4 tons of grass was cut and baled for the year.

The net pounds of nitrogen removed for the year (after deducting the fertilizer applied in the spring) is 1551 pounds. The total phosphorus removed for the year is 853 pounds.

Should you have any questions please call me at 302-934-3833.

Sincerely,

Beth B. Sise  
Environmental Control Mgr.
