RE: Nutrient Offset Plan Report: Revised

Dear Mr. Davis

This letter serves as the twenty-fourth installment of the Pinnacle Foods Group LLC Nutrient Offset Plan Report. As required by Special Condition #7 of Pinnacle's NPDES Permit DE 0000736, "The permittee shall submit progress reports every six months outlining actions taken toward implementing this plan".

Spray irrigation operations began on July 6, 2012 and came to a close on September 28, 2012. Over 16.2 million gallons were sprayed on the Reed Canary/Orchard grass site. The field was cut two times in 2012, once each in May and November. The May cutting yielded a total of 50 bales. The October cutting produced 104 bales. The total was 154 bales removed in 2012.

The net lbs. of Nitrogen and Phosphorous removed were 12286 lbs. Nitrogen and 2184 lbs. Phosphorous after fertilizer was added.

Should you have any questions please call me at 302-934-3833.

Sincerely,

Robert E. Lynch
Environmental/Wastewater Supervisor
