RE: Approval of the Xerxes Fiberglass septic tanks

Dear Mr. Sloan

The Division of Water Resources is pleased to inform you that we are able to approve the Xerxes Fiberglass septic tank for use in On-Site Wastewater Treatment and Disposal Systems in the State of Delaware.

The 4', 6', 8' and 10' diameter models are approved as direct equals to their masonry counterparts, subject to specific permit conditions. In the event that the design, construction, or materials used in the manufacturing of the tanks should change, re-approval by the Department will be required.

Please feel free to contact the Ground Water Discharges Section if you have any questions at 1-302-739-4761.

Sincerely,

Rodney L. Wyatt
Program Manager II
Ground Water Discharges Section

Delaware's good nature depends on you!
