RE: Approval of the A1801 and 1801-HIP effluent filters molded in PVC and ABS

Dear Mr.Christensen,

We are pleased to inform you that the above referenced effluent filters have been approved for use in on-site wastewater treatment and disposal systems in Delaware. While the Department recognizes the value of effluent filters in reducing the introduction of TSS and BOD into the absorption area, of on-site systems, we cannot advocate the use of or endorse any product.

If you have any further questions please contact the Department at (302) 739-4761.

Sincerely,

David W. Reinhold, PE, P.G.
Program Manager I
Ground Water Discharges Section

Delaware's good nature depends on you!
