How to Become a Licensed Wastewater Operator in the State of Delaware

Revised 10/2018

Wastewater Operator Certification & Licensing

State of Delaware
Department of Natural Resources
and Environmental Control
Division of Water
Surface Water Discharges Section

Prepared by the
Board of Certification for Wastewater Operators (Board)

What is a wastewater operator?

An individual, who at a given time, through observation, interpretation, or decision, operates a wastewater facility or a segment of a system or facility.

What is a wastewater facility?

The system of pipes, structures, equipment, or processes required to treat any wastewater, and dispose of the effluent; including the treatment, handling, and disposal of residuals and biosolids related thereto.

What certification levels are available?

The State of Delaware issues four (4) levels of wastewater operator licenses: Levels I, II, III & IV.

Level	Qualifications
I	High School Diploma or equivalency plus one (1) year of acceptable operating experience.
II	High School Diploma or equivalency plus three (3) years of acceptable operating experience in Wastewater Facilities of Class I or higher.
III	An Associate's Degree in science or engineering from an accredited college or university, or equivalent credit hours in any other curriculum as approved by the Board plus four (4) years of acceptable operating experience in Wastewater Facilities of Class II or higher; two (2) years of which must have been in a position of Direct Responsible Charge.
IV	A Bachelor's Degree in science or engineering from an accredited college or university, or equivalent credit hours in any other curriculum as approved by the Board plus four (4) years of acceptable operating experience in Wastewater Facilities of Class III or higher; two (2) years of which must have been in a position of Direct Responsible Charge.

How do I become licensed?

Becoming a licensed wastewater operator is a two-step process. *Step #1, the examination:*

Submit an Exam Registration Form with the non-refundable \$100 fee no later than 14 calendar days prior to the exam. Exams are held twice a year (2nd Friday in January & June) at Delaware Technical & Community College, Terry Campus.

Determine level of exam based on qualifications.

What types of exams are given?

There is a separate exam for each level of license consisting of multiple-choice and true/false questions. A score of 75% or higher is required to pass.

How will I be notified if I passed/failed the exam?

You will receive notice of your exam status (pass/fail) by mail approximately 4-6 weeks after the exam. Exam papers and grades will not be returned. Scores are valid for three (3) years from the date of the exam.

Please Note: You are not a licensed wastewater operator at this point.

Step #2 the application: Submit a completed Application for Certification, educational transcripts and the non-refundable \$50 fee.

What happens if I fail the exam?

If you fail the exam for a particular level on three (3) consecutive occasions, you will have to satisfactorily complete an approved education examination review course prior to being considered again to take that particular level of exam.

What happens if I pass the exam, but do not meet the educational requirements or do not have enough work experience?

If you do not meet the experience or the educational requirements you may, with the approval of the Board, receive an Operator-In-Training (OIT) license.

What type of employment verification is required?

You must be operating in Delaware or have a written job offer to operate in Delaware to receive consideration for a wastewater operator license.

How do I maintain my license?

Wastewater operator licenses are issued for a two (2) year period. To renew the license, provide proof that you have completed 20 hours of approved training in the past two (2) years [of which a minimum of ten (10) hours must be directly related to wastewater], submit a completed Application for Renewal and pay the non-refundable \$50 fee.

All courses, classes and training must be approved by the Board.

Duplication of directly related courses in consecutive renewal periods will be denied.

What training is available?

Visit our web site for an updated list of approved/denied courses.

http://www.dnrec.delaware.gov/wr/Information/SWDInfo/Documents/Approved_Courses.pdf

How will I know it's time to renew my license?

When possible, our office will send a courtesy renewal reminder letter to the last known address approximately 90 days prior to the license expiration date. If you fail to receive the renewal notice, you are still responsible for renewing your license. **Please call our office with address changes!**

What if I fail to renew by the expiration date of my license?

Failure to complete the training, submit the Application for Renewal, and/or pay the non-refundable \$50 fee by the expiration date will result in invalidation of the license. Please note per Section 10.1.2 of the Regulations, "It shall be unlawful for any person to perform the duties of a Delaware License Wastewater Operator without being duly licensed under the provisions of these regulations."

What do I do if my licensed has been invalidated?

Within two (2) years of the license expiration, provide proof that you have completed 20 hours of approved training [of which a minimum of ten (10) hours must be directly related to wastewater], submit a completed Application for Renewal and pay the non-refundable \$50 fee plus a non-refundable \$15 late surcharge fee.

Successful completion of a written exam is required if the license has been invalidated for two (2) or more years.
