Comments:

1. I use the bags that you are now banning for other purposes such a trash can liner. Now I will have to buy a thicker more environmentally unfriendly bag to replace these bags. 2. I have read the law and am now preparing for it to take forever to get through the checkout line while store employees figure out what they can and cannot put into these bags. 3. There should be no distinction between people on TANF, etc or people that just simply forgotten their bags or do not have enough bags with them. I am sure the cost will be passed onto the consumer regardless. 4. Using welfare dollars to pay for reusable bags when stores have always offered free bags is unconscionable. 5. It takes more energy to process a paper bag than a plastic bag, so to me, this is not really about the environment. 6. Please keep me informed when the final regulation is complete.
